General Introduction
Principles of Application, Technique and Diagnosis
Epidemiology and Etiology
Cytology Screening for Cervical Cancer
The Natural History of Cervical Intraepithelial Neoplasia
Classification and Reporting System for Gynecologic Cytology
The Application of Useful Techniques in Cytopathology
Anatomy, Histology and Cytology of Normal Uterine Cervix
Benign Lesions (Infection and Reaction)
A New Hypothesis on Histogenesis of Cervical Carcinoma
Reserve Cell: Benign Lesions and Malignancy
Histology of Precancerous Lesions (Cervical Intraepithelial Neoplasm - CIN)
Mild Dysplasia (CIN I)
Moderate Dysplasia (CIN II)
Severe Dysplasia and Carcinoma in Situ (CIN III)
Invasive Squamous Carcinoma of the Uterine Cervix
Special Types of Squamous Cell Carcinoma
Condyloma
The Cytology of Cervical Intraepithelial Neoplasia (CIN) and Pregnancy
The Normal Endocervix
Benign Disorders
Precursors of Adenocarcinomas: Cervical Intraepithelial Glandular Neoplasia
Invasive Adenocarcinoma
Special Types of Adenocarcinoma
Malignant Glandular and Related Tumors: Generalities
Atrophic Changes and the Proliferation Test
Differences in Cytologic Features
Management of Patients with Positive Cytology Findings
