Preface

Introductory Papers

Opening speech

The Third International Conference on the Protection of the North Sea--Review and Challenges

Report on the ICES/IOC North Sea Seagoing Workshop

Problem Analyses

A modular approach for modelling of the North Sea ecosystem

Alternative strategies for the disposal of UK estuarine dredgings

Regulation of effluents and implications for environmental policy

Modelling

An integral approach to support managerial actions on micropollutants in the southern North Sea

3-D model and field studies of silt transport in the Dutch coastal zone of the North Sea with emphasis on dump sites

Two- and three-dimensional models of dispersion based upon measurements in the North Sea

Sources and Inputs

The occurrence and the sources of black list substances in two river basins in The Netherlands

Pollution of the North Sea by West European rivers

Sources and fate of PCBs in the North Sea: A review of available data

Monitoring

North Sea Task Force Biological Effects Monitoring Programme

Towards integrated chemical and biological monitoring

Contamination with Organic and Inorganic Micropollutants

Distribution of organochlorine pollutants in North Sea sediments

Fate and effect of detergent chemicals in the marine and estuarine environment

Phthalate esters and other industrial organic chemicals in the North and Irish Seas

Offshore Pollution and Risk Assessments

Review of offshore chemical selection, use and operating procedure to minimize environmental impact

Concentrations of alpha- and gamma-hexachlorocyclohexane (Lindane) in the coastal waters of England and Wales

A comparison of the ecological risks from fisheries and pollution to the North Sea biota

Wastewater Treatment: Technical Facilities

Water pollution control in Amsterdam: its effect on North Sea environment and the role of harbour reception facilities

The design and construction of the "Houtrust" waste water treatment plant in The Hague

The Rotterdam initiative in reducing waste discharges at source

Wastewater Treatment: Nutrient Removal
Norwegian strategies in the treatment of municipal wastewater towards the reduction of nutrient discharges to the North Sea p. 179

Strategies for upgrading from primary treatment to nutrient removal at the Sandefjord Sewage Treatment Plant p. 187

High gradient magnetic separation technique for wastewater treatment p. 195

The introduction of nitrogen and phosphorus removal technologies for decreasing pollution of the Elbe river in Czechoslovakia p. 205

Techniques for and experience with biological nutrient removal--Danish long-term operating and optimization experience p. 211

Reduced hydraulic detention time for complete nutrient removal with innovative biological reactors p. 217

A systems choice for wastewater treatment systems for biological treatment of domestic wastewater with excessive N- and P-removal p. 231

Eutrophication of the North Sea

Nutrient loading to Norwegian coastal waters and its contribution to the pollution of the North Sea p. 239

Exceptional algal blooms in Dutch North Sea waters p. 251

Limiting factors for phytoplankton in the North Sea p. 261

Perspectives for the Future

Strategy for protecting the North Sea: a chemical industry perspective p. 269

Protecting the North Sea environment: trends and issues p. 277

Posters

Time-integrated methods for autonomous, in situ sampling of dissolved trace materials in open ocean, coastal and inland waters p. 283

Automatic identification and counting of phytoplankton p. 285

Segmented microcontinuous flow analysis for North Sea water quality monitoring p. 287

Biotechnological leaching of heavy metals from the silt fraction of dredged material: experiments using a membrane reactor p. 289

Filtration calculations for water development projects: software package p. 291

Fish disease as an indicator of environmental quality at sewage sludge dumping sites p. 295

Environmental impact of shipwrecks in the North Sea. I. Positive effects: epifauna of North Sea shipwrecks p. 297

Environmental impact of shipwrecks in the North Sea. II. Negative aspects: hazardous substances in shipwrecks p. 299

Heavy metal and radionuclide contamination of sediments from the Skagerrak and Northern Kattegat p. 301

TBT and the marine environment: recovery following legislation in the UK p. 303

Modelling transport behaviour and fate of micropollutants in the North Sea p. 305

Soil contamination, contaminant levels in benthic organisms and intake by oystercatchers on tidal flats in the Eastern Scheldt p. 309

Macro-pollutants on the Dutch continental shelf p. 313

The run off of nutrients from Funen, Denmark, and the consequences for its coastal waters p. 315

Bioassay of nutrient pollution in the North Sea p. 319

Protection of the outer Oslofjord p. 321
The red line in European marine eutrophication problems p. 323
Purification of reject water from sludge dewatering p. 325
Nutrient removal in a short retention time sewage treatment plant p. 327
A promising combination of two phosphate removal techniques: biological P-removal and the Crystalactor p. 329
Full-scale experiences with P-crystallisation in a Crystalactor p. 333
Phosphate elimination in a USB denitrification reactor p. 335
Practical experiments with chemical pre-treatment in a primary sedimentation tank p. 337
Protection of the North Sea ecosystem p. 339
Nitrogen and phosphorus budgets in Dutch agriculture and farm strategies to increase fertilizer efficiency p. 341
Integral risk analysis as a supporting framework for water quality management p. 343
Eutrophication and productivity modelling in stratified zones of the North Sea p. 347
Subject index p. 349

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
