Preface

Sensory Characterization of Off-Flavours

Odor standards in squeeze-bottle kits for matching quality and intensity p. 1
Sensory analysis of trout tainted by diesel fuel in ambient water p. 11
A comparison of 1988-1990 flavor profile analysis results with water conditions in two northern California reservoirs p. 19
Sensory and chemical characterization of fish tainted by exposure to oil sand wastewaters p. 27
Flavor tainting of fish in the Upper Wisconsin River caused by alkyl- and thiophenols p. 35

The use of organoleptic investigations to evaluate the quality of materials in contact with drinking water p. 41
Correlation of chemical and sensory data by principal component factor analysis p. 49
Public evaluation of fish tainting from pulp and paper mill discharges p. 57
Characterization of drinking water odour arising from spring thaw for an ice-covered upland river source p. 65
Chemical etiologies of off-flavor in channel catfish aquaculture p. 73
Physical chemical characterization of five earthy-musty-smelling compounds p. 81
Attempts to improve the sensitivity of an enzyme-linked immunosorbent assay for 2-methylisoborneol p. 89
Sensory gas chromatography for evaluation of taste and odor events in drinking water p. 97

Organochlorines as environmental tainting substances: taste panel study and chemical analyses of incubated mussels p. 105
The stability of geosmin and MIB and their deuterated analogues in surface waters and organic solvents p. 115
Volatile organic sulfur compounds associated with blue-green algae from inland waters of Japan p. 123
The source of 2,6-dibromophenol: cause of an idoform taint in Australian prawns p. 131
Characterization and identification of odorous compounds in ozonated waters p. 139
Odorous substances and cyanobacterial toxins in prairie drinking water sources p. 147
Flavor compounds in weakly polluted rivers as a means to differentiate pollution sources p. 155
Methods for the identification of tainting terpenoids and other compounds from algae p. 165

Biochemistry of Off-Flavours

Genetic studies into musty odor production by actinomycetes p. 171
Growth characteristics of the musty odor producing alga, Oscillatoria tenuis p. 177
Accumulation and release of geosmin during the growth phases of Anabaena circinalis (Kutz.) Rabenhorst p. 185
Biodegradation of 2-methylisoborneol by gravel sand filtration p. 191
Geosmin production and excretion in a planktonic and benthic Oscillatoria p. 199
Iron forms that influence the growth and musty odor production of selected cyanobacteria p. 207
A copper-tolerant Phormidium species from Lake Mathews, California, that produces 2-methylisoborneol and geosmin p. 217

Incidence of off-flavors in South African surface waters p. 225

Production and reduction of geosmin and 2-methylisoborneol during storage of river water in deep reservoirs p. 233

Drinking water off-flavour caused by 2,4,6-trichloroanisole p. 241

Off-flavors in surface waters - how efficient is bank filtration for their abatement in drinking water? p. 251

Physiology of geosmin production by Anabaena circinalis isolated from the Murrumbidgee River, Australia p. 259

Biodegradation of 2-methylisoborneol by oligotrophic bacterium isolated from a eutrophied lake p. 269

Chemical perception and response of the Nile tilapia to geosmin p. 277

Geosmin and 2-methylisoborneol production by cyanobacteria in fish ponds in the southeastern United States p. 283

Technology of Off-Flavour Abatement

Control of 2-methylisoborneol and geosmin by ozone and PEROXONE: a pilot study p. 291

Removal of musty-odorous compounds in water and retained in algal cells through water purification processes p. 299

Removal of musty odor compound in drinking water by biological filter p. 307

The use of sodium carbonate peroxyhydrate to treat off-flavor in commercial catfish ponds p. 315

Influence of the chlorination of natural nitrogenous organic compounds on tastes and odors in finished drinking waters p. 323

A summary of problem areas in aquatic off-flavour research p. 335

Subject index p. 341
