Preface

Muscle Receptors

Recent Work on the Development and Reinnervation of Muscle Spindles
Recovery of Function in Muscle Spindles after Long-term Denervation
Development of Spindles Following Nerve Crush in Newborn Rats
Studies on the Sensory Terminals of Mammalian Muscle Spindles
Studies on the Motor Innervation of the Cat's Muscle Spindle
Central and Reflex Recruitment of [gamma] Motoneurones of Individual Muscle Spindles of the Tenuissimus Muscle in Anaesthetised Cats
The Relation Between the Ability of Static [gamma] Axons to Drive Ia Afferents During Ramp or Tonic Stimulation and the Type of Intrafusal Fibres Innervated

Muscle History Dependence of Responses of Muscle Spindles to Stretch
Responses of Muscle Spindle Receptors to Transitions in Stretch Velocity
On the Nature of the [actual symbol not reproducible] Slow Decay of Cat Spindle Ia Firing Following Stretch
Unloading: a Reason Why Individual Golgi Tendon Organs Cannot Measure Muscle Force

Mechanisms of Nociception in Joints
Induction of Adrenergic Excitation of Nociceptive Sense Organs by Nerve Injury
The Interaction Between Joint and Cutaneous Afferent Input in the Regulation of Fusimotor Neurone Discharge
Interpretation of Spindle Afferent Recordings According to Intrafusal Fibre Influence
Activity of Muscle Proprioceptors in Cat Posture and Locomotion: Relation to EMG, Tendon Force and the Movement of Fibres and Aponeurotic Segments
Effects of [gamma] Fusimotor Tone on Dynamic and Static Responsiveness of I and II Fibre Populations to Gastrocnemius Stretches in Decerebrate Cats
Adaptive Control of Proprioception
Late Peripheral and Spinal Cord Reflex Changes Following Neonatal Nerve Crush in Rats

Human Muscle Spindles in Sampling and Reproduction of Precision Finger Movements
Selective Activation of Fusimotor Neurones Innervating Human Tibialis Anterior
The Fusimotor Functions in Man: a Microneurographic Study
Spinal Motoneurones and Motor Units
Some Comments on the Organization of Motoneurons
Regulated and Intrinsic Properties of the Motoneurone: Effect on Input-Output Relations
Compensation of the Low-Pass Filter Characteristics of Muscle by the Motoneurone Dynamic Sensitivity
Activity in Branches of Last Order Common Stem Presynaptic Input Fibres to Motoneurone Pools: a Mechanism for Muscle Synergy?
Quantal Excitatory Postsynaptic Potentials in Embryonic Motoneurons Grown in Slice Cultures of Spinal Cord, Dorsal Root Ganglia and Skeletal Muscle
Functions and Properties of Hindlimb Motor Units in Relation to Intramuscular Topography
Changes in Motor Unit Properties and Composition During Postnatal Development in the Rat

Length Tension Curves for Motor Unit Types in Cat Peroneus Longus Muscle

Motor Unit Properties After Single Muscle Immobilization

Gaze Muscle Afferents

Eye Muscle Proprioception in Strabismus and Related Disorders: Sensory and Motor Aspects

The Need for Eye Muscle Proprioception

Role of Eye Muscle Receptors in Development of Visual Cortical Cell Properties

Extraocular Proprioception and the Development of Depth Perception

The Origin of Horizontal Gaze Signals in Neck Muscles During Orienting

Extraocular Proprioceptive Afferents in Vestibular Nuclei: Physiological and Anatomical Studies

Ocular Muscle Proprioception and Ocular Motor Control

Spinal Circuits

Reciprocal Inhibition Between Elbow Muscles and its Control During Voluntary Movements in Man

The Regulation of Ia Inhibition During Co-Contraction in Man

Patterns of Group Ia Projections in the Upper Limb in Man

Increase in Ib Inhibition on Voluntary Contraction of Antagonistic Muscles in Man

Absence of Recurrent Inhibition in the Cat Distal Forelimb

Renshaw Recurrent Inhibition to Motoneurones Innervating Proximal and Distal Muscles of the Human Upper and Lower Limbs

Distribution of Heteronymous Recurrent Inhibition in Man

The C3-C4 Propriospinal System: Target-Reaching and Food-Taking

Low-Threshold Afferents Both Evoke and Depress Propriospinal-Like Excitation in Human Upper Limb Motoneurones

Organization of the Peripheral Excitatory Input to Propriospinal-Like Neurones

Descending Facilitation of Propriospinal-Like Neurones During Voluntary Contraction in Man

Excitation and Inhibition Among Respiratory Neurones in the Thoracic Spinal Cord of the Cat

Central Actions of Muscle Spindle Secondaries: Via Which Neuronal Pathways are they Evoked?

Patterns of Spinal Projection of Muscle Spindle Group II Fibres

On the Spinal Motor Function of Nociceptive Afferents and Enkephalins

Human Studies in the Analysis of the Stretch Reflex: an Essay

Pathophysiological Aspects of Spastic Movement Disorders

Differences in Reflex Control of Distal and Proximal Arm Muscles as Revealed in Patients with Central Motor Disorders

Organization of Reflexes Elicited by Flexor Reflex Afferents in Paraplegic Man. Evidence for a Spinal Stepping Generator

Presynaptic Inhibition in Dystonia

Validation of the Changes in Heterosynaptic Facilitation of Monosynaptic Responses of Spinal Motoneurons as a Test for Presynaptic Inhibition
Different Populations of Medullary Neurons Contributing to the Control of Locomotion  p. 447

Presynaptic Mechanisms During Locomotion in the Cat  p. 453
Presynaptic Inhibition as a “Filter” of Ib Information During Muscle Contraction  p. 459
Author Index  p. 465
Subject Index  p. 467
