Preface v

Mbe Growth and Characterization of Long Wavelength Dilute Nitride Iiiv Alloys

Introduction

MBE Growth of Dilute IIIV Nitrides

Dilute Nitride Characterization

Energy Band and Carrier Transport Properties

Annealing and NIn Nearest Neighbor Effects

Summary Acknowledgements

References

Epitaxial Growth of Dilute Nitrides By Metal-Organic Vapour Phase Epitaxy

Introduction

Epitaxial Growth of GaInAsN-based Structures

Long Wavelength GaAs-based Laser Performances

Conclusion

Acknowledgements

References

The Chemical Beam Epitaxy of Dilute Nitride Alloy Semiconductors

Introduction to Dilute Nitride Semiconductors

The Chemical Beam Epitaxial/Metalorganic Molecular Beam Epitaxial (CBE/MOMBE)  
Growth Process

CBE of Dilute Nitride Semiconductors

Fundamental Studies of GaN<sub>x</sub>As<sub>(1-x)</sub> Band Structure

The Compositions and Properties of Dilute Nitrides Grown by CBE

CBE-grown Dilute Nitride Devices

The Potential for Production CBE of Dilute Nitrides

Conclusions

Acknowledgements

References

Mombe Growth and Characterization Of Iiiv-N Compounds and Application to Inas Quantum  
Dots

Introduction

Mombe Growth and Characterization of GaAsN

Relation of In and N Incorporations in the Growth of GaInNAs

Growth and Characterization of GaAsNSe New Alloy

Application of GaAsN to InAs Quantum Dots

Summary

Acknowledgements

References

Recent Progress in Dilute Nitride Quantum Dots

Self-organized Quantum Dots

Dilute Nitride Quantum Dots

Recent Experimental Progress in GaInNAS QDS

Other Kinds of Dilute Nitride QDs

Summary and Future Challenges in Dilute Nitride QDs: Acknowledgements: References

Physics of Isoelectronic Dopants in GaAs

Nitrogen Isoelectronic Impurities

The Failure of the Virtual Crystal Approximation

Prevalent Theoretical Models on Dilute Nitrides

Electroreflectance Study of GaAsN

Resonant Raman Scattering Study of Conduction Band States

Compatibility with other Experimental Results

A Complementary Alloy: GaAsBi

Summary

Conclusion

References

Measurement of Carrier Localization Degree, Electron Effective Mass, And Exciton Size in  $\text{In}_x\text{Ga}_{1-2x}\text{As}_{1-2y}\text{N}_y$  Alloys

Introduction

Experimental

Single Carrier Localization in  $\text{In}_x\text{Ga}_{1-2x}\text{As}_{1-2y}\text{N}_y$

Measurement of the Electron Effective Mass and Exciton Wave function Size

Conclusions

Acknowledgements

References

Probing the Unusual Band Structure of Dilute Ga(Asn)Quantum Wells By Magneto-Tunnelling Spectroscopy and Other Techniques

Introduction

Resonant Tunnelling Diodes Based on Dilute Nitrides

Magneto-Tunnelling Spectroscopy to Probe the Conduction Band Structure of Dilute Nitrides

Electronic Properties: From the Very Dilute Regime ( $\sim 0.1\%$ ) to the Dilute Regime

Conduction in Dilute Nitrides and Future Prospects

Summary and Conclusions

Acknowledgements

References
