Antisense Receptor Targets
In vivo Modulation of G-proteins and Opioid Receptor Function by Antisense Oligodeoxynucleotides
Targeting Brain GABA-A Receptors with Antisense Oligonucleotides: Implications for Epilepsy
Delivery of Antisense DNA by Vectors for Prolonged Effects in Vitro and in Vivo
Antisense Mapping: Assessing the Functional Significance of Genes and Splice Variants
In Vivo and in Vitro Effects of Antisense on 2-Adrenoceptor Expression
Design and Efficacy of a Serotonin2A Receptor Antisense Oligodeoxynucleotide
The Use of Expression of Antisense mRNA for the Enzymes PC1 and PC2 in Prohormone Processing
Antisense Neuroscience Targets
Design and Testing of Antisense Oligonucleotide Strategies for the Central Nervous System
Use of Antisense Expression Plasmids to Attenuate G-Expression in Primary Neurons

Gene Functional Analysis in the Nervous System
RNA Mapping: Selection of Potent Oligonucleotide Sequences for the Antisense Experiment
Effects of Centrality Administered Antisense Oligodeoxynucleotides on Feeding Behavior and Hormone Secretion
Blockade of Neuropathic Pain by Antisense Targeting of TTX-Resistant Sodium Channels in Sensory Neurons
Application of Antisense Approach for the Study of Cell Adhesion Molecules in the Central Nervous System
Sequence Design and Practical Implementation of Antisense Oligonucleotides in Neuroendocrinology
Localization of Oligonucleotides in Brain by in situ Hybridization
Use of Antisense Oligonucleotides in Human Neuronal and Astrocytic Cultures
Pharmacokinetic Properties of Oligonucleotides in the Brain
Antisense Oligonucleotides--Preparation and in vivo Application to Rat Brain
The Application of Antisense Techniques to Characterize NEuronal Ion Channels in vitro
Antisense in Non-Neuronal Tissues
Antisense Inhibition of the Na-Ca Exchanger
Targeted Delivery of Antisense Oligonucleotides to Parenchymal Liver Cell in vivo

Antisense Methods for the Discrimination of Phenotypic Properties of Closely Related Gene Products: The Jun Kinase Family
Evaluation of the Biological Role of c-Jun N-terminal Kinase (NJK) using an Antisense Approach
The Role of Antisense in Kidney Cells
Use of Antisense Techniques in the Rate Renal Medulla
Antisense Approaches to in vitro Organ Culture
In vitro and in vivo Anti-Proliferative
