

Geometrical optics of acoustic media with anisometric random heterogeneities:

Travel time statistics of reflected and refracted waves

Monitoring temporal variations of physical properties inside the lithosphere by cross-correlating P and S arrivals and the coda of doublets

Source Effects from Broad Area Network Calibration of Regional Distance Coda Waves

A scattering wave-guide of heterogeneous subducting plate

Coherent Back-scattering and weak Localization of Seismic Waves

Observing and modeling elastic scattering in the deep Earth

Coda Q and coda energy distribution

Synthesis of vector-wave envelopes in random elastic media on the basis of the Markov approximation

Seismic wave scattering in volcanoes
