

Authors	p. x
Preface to the Second Edition	p. xii
Preface to the First Edition	p. xiii
Basic Concepts for Earth System Science	p. 1
Introduction: Biogeochemical Cycles as Fundamental Constructs for Studying Earth System Science and Global Change	p. 3
Introduction	p. 3
History	p. 5
Evidence for the Coupled Nature of the Earth System	p. 6
Philosophy of Using the Cycle Approach to Describe Natural Systems on Earth	p. 9
Reservoir Models and Cycles - Some Definitions	p. 9
The Philosophy of Integration as a Basis for Understanding the Earth System	p. 11
The Limitations and Challenges of Understanding Earth Systems	p. 12
References	p. 12
The Origin and Early Evolution of the Earth	p. 14
Introduction	p. 14
Pre-Solar Evolution: The Origin of the Elements	p. 14
The Origin of the Solar System	p. 19
Condensation	p. 20
Accretion of the Planets	p. 23
Early Evolution of the Earth	p. 25
Earth and the Development of Life	p. 27
References	p. 28
Evolution and the Biosphere	p. 29
The Origin of Life on Earth	p. 29
The Machinery of Life	p. 31
Evolutionary Mechanisms	p. 35
The Diversity of Living Organisms	p. 42
The Ecological Organization of the Living World	p. 46
The Impact of Life on Biogeochemical Cycles	p. 48
How Biogeochemical Cycles Affect Life	p. 53
References	p. 55
Appendix	p. 57
Modeling Biogeochemical Cycles	p. 62
Introductory Remarks	p. 62
Time Scales and Single Reservoir Systems	p. 62
Coupled Reservoirs	p. 67
Fluxes Influenced by the Receiving Reservoir	p. 73
Coupled Cycles	p. 74
Forward and Inverse Modeling	p. 74
High-Resolution Models	p. 74
Transport Processes	p. 76

Time Scales of Mixing in the Atmosphere and Oceans	p. 81
Questions	p. 83
References	p. 83
Equilibrium, Rate, and Natural Systems	p. 85
Introduction	p. 85
Thermodynamics	p. 85
Oxidation and Reduction	p. 91
Chemical Kinetics	p. 96
Non-Equilibrium Natural Systems	p. 101
Summary	p. 103
Questions	p. 103
References	p. 104
Properties of and Transfers between the Key Reservoirs	p. 107
Water and the Hydrosphere	p. 109
Introduction	p. 109
Global Water Balance	p. 112
Hydrologic Variability	p. 119
Water and Climate	p. 124
Water and Biogeochemical Cycles	p. 127
Water and the Tectonic Cycles	p. 128
Anthropogenic Influences	p. 128
Conclusion	p. 129
References	p. 130
The Atmosphere	p. 132
Definition	p. 132
The Vertical Structure of the Atmosphere	p. 133
Vertical Motions, Relative Humidity, and Clouds	p. 136
The Ozone Layer and the Stratosphere	p. 137
Horizontal Motions, Atmospheric Transport, and Dispersion	p. 138
Composition	p. 142
Atmospheric Water and Cloud Microphysics	p. 144
Trace Atmospheric Constituents	p. 146
Chemical Interactions of Trace Atmospheric Constituents	p. 150
Physical Transformations of Trace Substances in the Atmosphere	p. 152
Influence of Atmospheric Composition on Climate	p. 153
Chemical Processes and Exchanges at the Lower and Upper Boundaries of the Atmosphere	p. 156
References	p. 158
Soils, Watershed Processes, and Marine Sediments	p. 159
Introduction	p. 159
Weathering	p. 160
Soils	p. 164

Watershed Processes	p. 177
Marine Sediments	p. 184
Soils, Weathering, and Global Biogeochemical Cycles	p. 189
Questions	p. 190
References	p. 190
Tectonic Processes and Erosion	p. 195
Introduction	p. 195
Erosion, a Capsule Summary	p. 196
Soils and the Local Weathering Environment	p. 198
Slope Processes and the Susceptibility of Lithologies to Erosion	p. 202
Landforms, Tectonism, Sea Level, and Erosion	p. 206
Erosion in Tectonically Active Areas	p. 212
Erosion of the Cratons	p. 216
The Effects of Transients: Continental Ice Sheets and Human Technology	p. 220
Conclusion	p. 223
Questions	p. 224
References	p. 224
The Oceans	p. 230
What is the Ocean?	p. 230
Ocean Circulation	p. 232
Biological Processes	p. 246
Chemistry of the Oceans	p. 255
Questions	p. 273
References	p. 273
Biogeochemical Cycles	p. 279
The Global Carbon Cycle	p. 282
Introduction	p. 282
The Isotopes of Carbon	p. 283
The Major Reservoirs of Carbon	p. 284
Fluxes of Carbon between Reservoirs	p. 297
Models of the Carbon Cycle	p. 302
Trends in the Carbon Cycle	p. 303
References	p. 309
The Nitrogen Cycle	p. 322
Introduction	p. 322
Chemistry	p. 322
Biological Transformations of Nitrogen	p. 325
Anthropogenic Nitrogen Fixation	p. 328
Atmospheric Chemistry	p. 329
The Global Nitrogen Cycle	p. 331
Human Impacts	p. 334

Questions	p. 339
References	p. 340
The Sulfur Cycle	p. 343
Introduction	p. 343
Oxidation States of Sulfur	p. 344
Sulfur Reservoirs	p. 346
The Atmospheric Cycle of Sulfur	p. 347
Hydrospheric Cycle of Sulfur	p. 354
Questions	p. 358
References	p. 358
The Phosphorus Cycle	p. 360
Occurrence of Phosphorus	p. 360
Sub-Global Phosphorus Transfers	p. 364
The Global Phosphorus Cycle	p. 367
Questions	p. 373
References	p. 374
Trace Metals	p. 377
Introduction	p. 377
Metals and Geochemistry	p. 377
An Overview of Metal Ion Chemistry	p. 381
Observations on Metals in Natural Systems	p. 402
Examples of Global Metal Cycling	p. 406
Summary	p. 414
Questions	p. 415
References	p. 416
Integration	p. 419
The Acid-Base and Oxidation-Reduction Balances of the Earth	p. 421
Introduction	p. 421
A Hierarchy of Acid-Base Balances	p. 422
Oxidation-Reduction Balances of the Earth System	p. 428
Conclusion	p. 437
References	p. 437
The Coupling of Biogeochemical Cycles and Climate: Forcings, Feedbacks, and Responses	p. 439
The Climate System	p. 439
The Dynamics of the Climate System: Forcings, Feedbacks, and Responses	p. 442
Forcings of Climate	p. 446
Feedbacks	p. 450
Climatic States and Responses	p. 456
References	p. 457
Ice Sheets and the Ice-Core Record of Climate Change	p. 459
Introduction	p. 459

Quaternary Climate Change	p. 460
Ice Sheets as Paleoclimate Archives	p. 466
Some Lessons in Environmental History	p. 489
References	p. 494
Human Modification of the Earth System: Global Change	p. 498
Global Climate Change	p. 498
Acid Precipitation	p. 500
Food Production	p. 501
Stratospheric Ozone Depletion	p. 501
Large-Scale Eutrophication	p. 503
Oxidative Capacity of the Global Troposphere	p. 503
Life and Biogeochemical Cycles	p. 504
Conclusion	p. 506
References	p. 507
Answers to Questions	p. 509
Index	p. 511
