Molecules of the Cytoskeleton
Actin and Actin-Associated Proteins
Tubulin Gene Expression in Higher Plants
The Molecular Pharmacology of Plant Tubulin and Microtubules
Potential Significance of Microtubule Rearrangement, Translocation and Reutilization in Plant Cells
Microtubule-Associated Proteins in Higher Plants
Cytoplasmic and Nuclear Intermediate Filament Antigens in Higher Plants
The Cell Wall
Microtubule-Mediated Control of Microfibril Deposition: A Re-Examination of the Hypothesis
The Biochemistry of Cellulose Synthesis
Architecture of the Primary Cell Wall
Biochemistry of Xyloglucans in Regulating Cell Elongation and Expansion
Directional Cell Expansion
Regulation of Cell Expansion
Microtubules and the Regulation of Cell Morphogenesis by Plant Hormones
Role of the Cytoskeleton in Gravity Perception
In Vitro Xylogenesis. Mitosis
Mitosis in Plants
Patterns of Regulation During Mitosis. Determination of the Division Plane
The Preprophase Band
Cytoskeletal Elements of the Phragmosome Establish the Division Plane in Vacuolated Higher Plant Cells
The Cytokinetic Apparatus in Meiosis: Control of Division Plane in the Absence of a Preprophase Band of Microtubules
The Cytoskeleton in Plant Development
The Cytoskeleton in Fern Protonematal Growth in Relation to Photomorphogenesis
The Cytoskeleton and Moss Morphogenesis
Mutual Alignments of Cell Walls, Cellulose and Cytoskeletons--Their Role in Meristems
