Introduction

The Historical Background of Behavioral Studies in Parkinson's Disease

Clinical and Neurobiological Aspects of Parkinson's Disease

Neuropsychological Evaluation of Parkinson's Disease

Cognitive Impairments

Memory Disturbances in Parkinson's Disease

Visuospatial Abnormalities in Parkinson's Disease

Executive Function

Bradyphrenia in Parkinson's Disease

Clinical Correlates of Cognitive Impairment in Parkinson's Disease

Cognition and Hemiparkinsonism

Dementia

Prevalence of Dementia in Parkinson's Disease

The Dementia Syndromes of Parkinson's Disease: Cortical and Subcortical Features

Neuroimaging Correlates of Dementia in Parkinson's Disease

Pathological Correlates of Dementia in Parkinson's Disease

Biochemical Correlates of Cognitive Changes and Dementia in Parkinson's Disease

Electrophysiological Correlates of Dementia in Parkinson's Disease

Depression

Clinical Subtypes of Parkinson's Disease and Depression

Santamaria

Biochemistry of Depression in Parkinson's Disease

Drug Treatment of Depression in Parkinson's Disease

The Role of Electroconvulsive Therapy in Parkinson's Disease

Drug Therapy and Behavior

Pharmacology of Parkinson's Disease

The Effects of Dopamine Fluctuation on Cognition and Affect

Effect of Anti-Parkinsonian Drugs on Memory

Neuropsychiatric Complications of Drug Treatment of Parkinson's Disease

Behavioral Effects of Intrastriatal Adrenal Medullary Surgery in Parkinson's Disease

Summary

Conclusions and Future Directions
