

Contributors	p. xi
Introduction	p. 1
Physics of Flow Above the Sediment-Water Interface	p. 4
Elements of Benthic Boundary Layers	p. 5
Structure	p. 5
Energy Cascade and Coherent Motions	p. 6
A Historical Perspective	p. 7
Benthic Boundary Layer Hydrodynamics	p. 9
Governing Equations	p. 9
The Logarithmic Layer and Coriolis Deflection	p. 12
Structure of the Constant Stress Layer	p. 14
A Hierarchy of Hydrodynamic Models	p. 18
Local Closure	p. 18
Eddy Viscosity Formulas	p. 19
Nonlocal Closure Schemes	p. 19
A Model for Discrete Turbulent Elements Near the Bed	p. 21
Boundary Conditions	p. 22
The Brinkman Layer and the No-Slip Condition	p. 22
Roughness	p. 23
BBL Development, Spatial Averaging of Roughness, and Flow Separation	p. 26
Local Effects of Roughness and Bed Mobility	p. 27
Biological Effects	p. 28
Benthic Boundary Layer Stratification	p. 29
Topographic Effects	p. 31
Turbulent Wave-Current Boundary Layers	p. 33
Estimating Bed Shear Stress	p. 34
Quadratic Drag Laws	p. 35
Semi-logarithmic Velocity Gradient	p. 36
Near-Bed Reynolds Stress and TKE	p. 36
TKE Dissipation Rate in the Inertial Subrange	p. 37
Prospects	p. 37
Fine-Scale Flow Measurements in the Benthic Boundary Layer	p. 44
Thermal Anemometry Technique	p. 44
Sensor Design	p. 45
Heat Transfer Correlations	p. 47
The Anemometer Circuit	p. 48
Calibration of Hot-Film Probes	p. 49
Problems Associated with Hot-Film Measurements in Water	p. 49
Hot-Film Measurements in a Boundary Layer	p. 50
Examples of Thermal Anemometry in BBL Research	p. 51
Laser Anemometry	p. 51

Laser Doppler Anemometry	p. 52
Examples of LDA Applications	p. 54
Particle Image Velocimetry	p. 56
Examples of PIV Applications	p. 59
Positron Emission Tomography and Flow in Sediments	p. 61
Setup and Basic Principles of PET	p. 61
Examples and Limitations of PET	p. 62
Acoustic Devices for Large-Scale Measurements	p. 64
Flumes as Experimental Tools for BBL Research	p. 65
Characterization of Open Channel Flow	p. 65
Practical Considerations around Flume Experiments	p. 67
Flow Generation in Flumes	p. 68
Flume Designs for Special Purposes	p. 69
Examples of BBL Studies Using Flumes	p. 69
Suspended Particle Transport in Benthic Boundary Layers	p. 78
Sinking Speed	p. 79
Eddy Viscosity and Diffusivity	p. 85
Boundary Conditions	p. 88
Concentration Bottom Boundary Condition	p. 90
Flux Bottom Boundary Condition	p. 91
Bottom Boundary Condition for Nonzero $E_s(0^+,t)$	p. 93
Models with Nonlocal Injection from the Bed	p. 94
Effect of Nonlocal Injection on Estimates of $\gamma_0$	p. 97
Summary of Bottom Boundary Conditions	p. 97
Conclusions	p. 98
Solute Transport Above the Sediment-Water Interface	p. 104
Solute Transport Near a Flat Solid Surface	p. 104
Classical Eddy Diffusion Theory	p. 104
Periodic Boundary Layer Models	p. 109
Higher Order Closure Models	p. 111
Mass Transfer with a Porous Interface	p. 112
Effects of Porosity and Permeability	p. 112
Effects of Surface Roughness	p. 114
Unequal or Changing Reactivity of the Sediment Surface	p. 117
Mass Transfer in the BBL with Reaction	p. 120
Influence of the Time Scale of Reaction	p. 120
Turbulence and Nonlinear Reactions	p. 121
Summary and Some Directions for Future Work	p. 123
The Fine Structure and Properties of the Sediment Surface	p. 127
Integrated Studies	p. 127
Visualization of the Sediment-Water Interface	p. 128

Towards a Correlative Approach	p. 130
Fine-Scale Properties of the Sediment Surface	p. 133
Temporal Variability in Sediment Properties	p. 134
Optical Properties	p. 136
Conclusions	p. 139
Porewater Flow in Permeable Sediments	p. 144
Introduction to Advective Transport	p. 144
Molecular Diffusion Versus Advection	p. 144
The Physics of Porewater Transport and Darcy's Law	p. 144
Advective Transport in the Marine Environment	p. 146
Mechanisms of Advective Transport	p. 147
Current-Induced Advective Transport	p. 147
Wave-Induced Advection in Sediments	p. 154
Density-Driven Convection	p. 160
Consequences of Advective Transport	p. 162
Spatial and Temporal Zonation Due to Advection	p. 162
The Impact of Advective Flows on Sediment Geochemistry	p. 164
Consequences to the Natural Environment	p. 169
Summary and Suggestions for Future Research	p. 170
Biogeochemical Microsensors for Boundary Layer Studies	p. 180
Electrochemical Microsensors	p. 181
Reference Electrodes	p. 181
Ag/Ag <sup>+</sup> Half-Cell Microelectrodes	p. 181
Ion-Exchange-Based Microsensors	p. 187
Simple Microsensors with Continuous or No Polarization	p. 189
Gas Microsensors with Ion-Impermeable Membranes	p. 191
Instrumentation for Electrochemical Microsensors	p. 193
Optical Microsensors	p. 194
Field Radiance Microprobes	p. 194
Irradiance and Scalar Irradiance Microprobes	p. 195
Microprobes for Fluorescence and Surface Detection	p. 196
Fiber-Optic Microsensors: Micro-opt(r)odes	p. 197
Instrumentation for Fiber-Optic Microsensors	p. 198
Microbiosensors	p. 199
Methane Microbiosensor	p. 200
Nitrate Microbiosensor	p. 200
Microsensors for Diffusivity and Water Velocities	p. 202
Diffusivity Microsensor	p. 202
Flow Microsensor	p. 203
Physical Disturbance Caused by Sensor Insertion	p. 203
Summary and Some Directions for Future Work	p. 203

Diagenesis and Sediment-Water Exchange	p. 211
Biogeochemical Processes and BBL Interactions	p. 212
Processes with Direct BBL Interaction: Oxygen Uptake	p. 213
Processes with Indirect BBL Interaction: Denitrification	p. 219
Processes with Reaction in the BBL: Manganese and Iron Cycling	p. 222
Processes Independent of the BBL	p. 226
Quantitative Modelling of Solute Profiles and Fluxes	p. 226
Overview of Diagenetic Models	p. 226
Dissolution or Precipitation of a Solid	p. 229
Oxygen Uptake in Sediments	p. 230
Transport with Reaction in Sediments and the DBL	p. 233
Modeling the Solids Exchange	p. 234
Parting Thoughts	p. 238
In Situ Sampling in the Benthic boundary Layer	p. 245
Methodologies	p. 245
Particle Transport Measurements	p. 245
Solute Flux Measurements	p. 248
Deployment Platforms and Vehicles	p. 249
Limitations	p. 252
Problems of Spatial Scale and Temporal Variability	p. 252
Instrument Effects	p. 253
Examples of Emerging Experimental Strategies	p. 255
An Unresolved Shallow-Water Question	p. 255
A Deep-Sea Example: BIOPROBE	p. 261
Concluding Remarks	p. 263
Transport and Reactions in the Bioirrigated Zone	p. 269
Average Transport Properties in the Bioirrigated Zone	p. 269
Excavation, Irrigation, and Sediment Fluidization	p. 271
Biogenic Turbulent Diffusion Analogy	p. 273
Biogenic Advection	p. 277
Apparent Source-Sink or Nonlocal Exchange Models	p. 278
Diagenetic Reaction Distributions in the Bioirrigated Zone	p. 282
Average-Microenvironment-Analog Transport Models	p. 283
Interactions Between Solute Transport and Reaction Kinetics	p. 289
Biogenic Sediment Fabric and Microscale Transport	p. 291
Structure and Biogeochemistry of the Bioturbated Zone	p. 294
Summary and Conclusions	p. 295
Constraining Organic Matter Cycling with Benthic Fluxes	p. 302
Seafloor Solute Exchange Mechanisms and Rates	p. 302
Biogeochemical Cycling on the Continental Shelf	p. 305
Biogeochemical Cycling on the Continental Slope	p. 309

Biogeochemical Cycling on the Abyssal Seafloor	p. 311
Macroscopic Animals and Plants in Benthic Flows	p. 320
Flow Modification of Sensory Fields	p. 321
Chemosensing	p. 321
Other Sensory Cues	p. 323
Flow Effects on Momentum and Mass Transfer	p. 325
Mass and Momentum Transfer to and from Macrophytes	p. 325
Momentum and Mass Transfer in Other Benthic Settings	p. 329
Benthic Populations and Larval Dynamics	p. 330
Spawning and Fertilization	p. 330
Dispersal	p. 332
Settlement and Recruitment	p. 334
Settlement Probability	p. 336
Conclusions	p. 337
Life in the Diffusive Boundary Layer	p. 348
A Viscous World	p. 348
Moving at Low Reynolds Numbers	p. 349
Transport by Diffusion	p. 351
Solute Transport to Moving Particles	p. 351
Diffusion Field Around Particles	p. 352
The Benthic Diffusive Boundary Layer	p. 354
DBL Visualization by Microelectrodes	p. 355
DBL Dynamics	p. 357
Surface Roughness	p. 359
Microelectrode Interference with the DBL	p. 361
Diffusive Boundary Layer Thickness	p. 364
Overcoming the Diffusion Limitation	p. 366
Gradient Sulfur Bacteria	p. 367
Interfacial Microbial Mats and Biofilms	p. 374
Structure and Composition of Biofilms and Mats	p. 377
Techniques for Structural Analysis	p. 377
Staining of Structural Components	p. 377
Case Study of a Model Biofilm	p. 379
Function of Biofilms and Microbial Mats	p. 380
Role of Boundary Layers	p. 381
Diminution of Mass-Transfer Resistance	p. 383
Measurements in a Model Biofilm	p. 385
Diffusional Mass Transfer in Biofilms and Mats	p. 388
New Approaches to Mass Transfer in Biofilms and Mats	p. 389
List of Common Symbols	p. 395
Index	p. 397
