Motility
Musculature
Gastrointestinal Physiology, 1815-1975: Motility
Structure of Intestinal Musculature
Distribution and Exchange of Electrolytes in Gastrointestinal Muscle Cells
Electrophysiology of Dissociated Muscle Cells
Electrophysiology of the Gastric Musculature
Electrophysiology of the Intestinal Musculature
Electrophysiology of Colonic Smooth Muscle
Mechanical Properties of Gastrointestinal Smooth Muscle
Neurobiology
Enteric Neurons in Culture
Interstitial Cells of Cajal
Identification of Transmitters of Functionally Defined Enteric Neurons
Neurotransmitter Release in the Enteric Nervous System
Neuromuscular Transmission in the Gastrointestinal Tract
Electrical and synaptic Behavior of Enteric Neurons
Physiology of Prevertebral Ganglia in Mammals with Special Reference to Interior Mesenteric Ganglion
Sensory Afferents from the Gastrointestinal Tract
Control Centers in the Central Nervous System for Regulating Gastrointestinal Motility
Central Nervous System Mechanisms in Degustition and Emesis
Pharmacology
Pharmacology of Drugs Acting on Intestinal Motility
Pharmacology of Neuroendocrine Peptides
Motor Function
In Vivo Myoelectric Activity: Methods, Analysis and Interpretation
Esophageal Motility
Determinants of Gastric Emptying and Transit in the Small Intestine
Colonic Motility
Villous Motility
Sphincteric Function
Motor Function of Anorectum and Pelvic Floor Musculature
Motility of the Biliary System
Pharmacology of Biliary Tract
Normal Motility
Parasitic Infections and Gastrointestinal Motility
Alterations of Small Intestine Motility by Bacteria and Their Enterotoxins
Motor and Myoelectric Activity Associated with Vomiting, Regurgitation and Nausea

Adaptation to Surgical Perturbations
