Bases and the distribution of irreducible and primitive polynomials over finite fields
Construction and distribution for irreducible trinomials over finite fields
Congruences for generalised Dickson polynomials
Dickson polynomials and completely normal elements over finite fields
An iterated normal elements over finite fields
Weakly self-dual normal bases in finite fields
On the quaternary [11,6,5] and [12,6,6] codes
On the nonexistence of some Quaternary codes
A new RSA-type cryptosystem based on singular cubic curves
A generalisation of the discrete Fourier transform
On a generalized minimum distance Reed-Solomon decoding algorithm
