Homogenization and Periodic Structures with Holes
An Approximation Lemma for W1,p Functions
Thin Insulating Layers: The Optimization Point of View
Lower Semicontinuity and Relaxation for Some Problems in Optimal Design
Mathematical Models of Phase Boundaries
Continua with Constrained or Latent Microstructure
A Counterexample in the Vectorial Calculus of Variations
Elastic Invariants in Crystal Theory
Conservations in Solutions to Conservative Systems
Some Constrained Elastic Crystals
Some Results for a Linear, Partly Hyperbolic Model of Viscoelastic Flow Past a Plate

Derivation and Validity of the Boltzmann Equation: Some Remarks on Reversibility
Concepts, the H-functional and Course Graining
Some Remarks on Uniqueness Properties
On a Certain Variational Problem of Phase Equilibrium
Some Remarks on Non-convex Problems
Experimental and Theoretical Aspects of Cellular and Dendritic Solidification
Some Asymptotic Problems of Linear Elasticity
Phase Mixtures in Nonlinear Viscoelasticity in One Dimension
