The handling of time: introduction and survey
Semantical presentation of temporal connectives
Axiomatic presentation of propositional temporal connectives
Predicate temporal logics
Temporal logics presented in the predicate calculus: language-metalanguage
A general theory of axiomatization for propositional temporal logic
Basic many-dimensional systems
Propositional quantifiers and fixed point operators
Expressive power of one-dimensional temporal connectives: basic concepts
Expressive completeness of Since and Until over integer and real time
Expressive completeness of Stavi connectives over general linear time
Further expressive completeness results
H-dimension
Adding a temporal dimension to a logic system
Decidability in temporal logic
