Mechanics of Knowledge Processing
Modularity of Knowledge
Propositional Logic Programming
Computation Models in Prolog
On the Construction of Unifying Terms Modulo a Set of Substitutions
Plausible Inference and Negation in Horn Clause Logic
A Note on First-Order Theories of Individual Concepts and Propositions
Induction Formulation of Programs and Descriptions
Inverting the Resolution Principle
Non-Monotonic Learning
Interactive Induction
Models of Inductive Syntactical Synthesis
Optimality and Error in Learning Systems
Deriving the Learning Bias from Rule Properties
Error Tolerant Learning Systems
Use of Sequential Bayes with Class Probability Trees
Qualitative Representations of Knowledge
Exploring Structures: An Exercise in Model-Based Interpretation and Planning
Learning of Causality by a Robot
A Qualitative Way of Solving the Pole Balancing Problem
Applications and Models of Knowledge Acquisition
Information Content of Chess Positions: Implications for Chess-Specific Knowledge of Chess Players
Promis: Experiments in Machine Learning and Protein Folding
Varying Levels of Abstraction in Qualitative Modelling
Design of Knowledge Processing Systems--Principles and Practice
