

Glossary	p. xiii
The Conservation Paradox	p. 1
Two early conservation approaches: preservation and utilization	p. 2
The balance of nature?	p. 4
A paradigm shift in ecology	p. 5
Ecosystem management: coping with complexity	p. 6
The role of long-term data in ecosystem management	p. 9
The Elephant Dilemma: A Long-term Perspective on the Management of African Savannas	p. 13
The Tsavo 'experiment'	p. 14
From 'command and control' to flux of nature: elephant management in the Kruger National Park, South Africa	p. 18
Elephants, trees, and carbon dioxide	p. 24
Palaeoecology and thresholds of potential concern	p. 26
Summary: too many elephants-or too many trees?	p. 28
Where The Wild Things Were: Re-wilding and the Sixth Extinction	p. 30
Late Quaternary extinctions	p. 31
Pleistocene parks	p. 37
Wild wood or wood-pasture? Re-wilding in Europe	p. 41
Carnivores as keystone species	p. 45
Resurrecting island ghosts	p. 48
Summary: towards wildness?	p. 51
A Burning Question: Can Long-term Data Inform Fire Management in the Twenty-first Century?	p. 54
Shifting baselines	p. 56
Resilience, feedbacks, and complexity	p. 60
What is natural?	p. 63
Fire management, biodiversity, and ecosystem services	p. 68
To burn or not to burn? Fire management in the Anthropocene	p. 71
Summary: friend or foe?	p. 85
Past, Present, and Future Climate Change: Can Palaeoecology Help Manage a Warming World?	p. 87
Learning from past warm climates	p. 88
Climate change, palaeoecology, and conservation planning	p. 99
Summary: can we build resilience in a perfect storm?	p. 114
Ecosystem Services: Lessons From the Past for a Sustainable Future	p. 116
Water management	p. 118
Soil management, carbon storage, and sustainable agriculture in the tropics	p. 125
Biocultural diversity	p. 129
Cultural ecosystem services	p. 134
Summary: an integrated approach to ecosystem service management	p. 136
Nature, Culture, and Conservation in the Anthropocene	p. 139

Adaptive cycles in the palaeoecological and historical records	p. 141
Towards multifunctional landscapes	p. 149
Conserving the cultural landscapes of the Anthropocene	p. 163
Summary; can multifunctional landscapes sustain biodiversity in the Anthropocene?	p. 166
Conclusions: Conservation in the Anthropocene	p. 168
Can ecosystem management resolve the conservation paradox?	p. 169
Benchmarks, baselines, and thresholds of potential concern	p. 170
Climate change adaptation and amelioration	p. 171
Complexity, uncertainty, and modelling the past-present-future continuum	p. 171
Disturbance, resilience, and heterogeneity	p. 172
Restoring ecosystem services	p. 173
Sustainability and adaptive capacity in socioecological systems; merging 'traditional' and adaptive management approaches	p. 174
Is there a place for 'wilderness' in the Anthropocene?	p. 175
Stakeholder engagement and collaborative learning	p. 176
Sustainability and multifunctional landscapes	p. 177
Summary: using palaeoecology to manage dynamic landscapes in the Anthropocene	p. 178
References	p. 179
Index	p. 209
