Improving the Java Memory Model Using CRF

Exclusion for Composite Objects

Object-Oriented Real-Time Concurrency

Adaptive Optimization in the Jalapeno JVM

Quicksilver: A Quasi-Static Compiler for Java

Sealed Calls in Java Packages

A Real World Object Modeling Method for Creating Simulation Environment of Real-time Systems

Formal Specification of CORBA Services: Experience and Lessons Learned

Middleware Object Query Processing with Deferred Updates and Autonomous Sources

MultiJava: Modular Open Classes and Symmetric Multiple Dispatch for Java

Parametric Polymorphism in Java: An Approach to Translation Based on Reflective Features

Finding Refactorings via Change Metrics

Mapping UML Designs to Java

PIROL: A Case-Study for Multidimensional Separation of Concerns in Software Engineering Environments

Safely Creating Correct Subclasses without Seeing Superclass Code

OOLALA: An Object-Oriented Analysis and Design of Numerical Linear Algebra

Towards Agent-Oriented Assistance for Framework Instantiation

Practical Virtual Method Call Resolution for Java

Scalable Propagation-Based Call Graph Construction Algorithms

A Study of Devirtualization Techniques for a Java Just-In-Time Compiler

An Efficient Class and Object Encoding

A Formal Specification of Java Class Loading

An Aristotelian Understanding of Object-Oriented Programming

Application Isolation in the Java Virtual Machine

An Approach to Safe Object Sharing

Guava: A Dialect of Java Without Data Races
