Conclusion

Electric Utility Generating Equipment

Introduction
The Technology of Electricity Generation
Postwar Performance of the Electric Utility Industry
Characteristics of the Sample of Generating Plants
Hedonic Price Regressions for Equipment Cost
Price Indexes Implied by Hedonic Regression Equations
Adjusting for Changes in Operating Cost
The Impact of Environmental Legislation
Conclusions and Topics for Further Research

Computer Processors and Peripherals

Introduction
The Postwar Development of the Computer Industry
Implementation of the Hedonic Regression Methodology
The Data
Regression Results
The New Processor Price Index and Its Interpretation
Peripherals and Weighting Issues
Price Indexes for Personal Computers: A Pilot Study
Conclusion

Electrical Appliances

Introduction
The Postwar Development of the Appliance Industry
Data Sources: The Sears Catalog and CR
Common Features of the Hedonic Regression Equations
Household Refrigerators and Refrigerator-Freezers
Room Air Conditioners
Washing Machines
Clothes Dryers
TV Sets
Other Products
Overall Price Indexes and Conclusion

New and Used Automobiles

Introduction
Issues That Arise in Estimating Hedonic Regressions for Automobiles
Data Used in the Hedonic Regression Study
Regression Estimates for New Cars
Hedonic Regression Estimates for Used Cars
Changes in Quality Mandated by Safety and Environmental Regulations
Fuel Economy
