Foreword
Preface
Introduction: Bringing Programming to End Users
Pygmalion: An Executable Electronic Blackboard
Tinker: A Programming by Demonstration System for Beginning Programmers
A Predictive Calculator
Rehearsal World: Programming by Rehearsal
SmallStar: Programming by Demonstration in the Desktop Metaphor
Peridot: Creating User Interfaces by Demonstration
Metamouse: An Instructible Agent for Programming by Demonstration
TELS: Learning Text Editing Tasks from Examples
Eager: Programming Repetitive Tasks by Demonstration
Garnet: Creating User Interfaces by Demonstration
The Turvy Experience: Simulating an Instructible Interface
Chimera: Example-Based Graphical Editing
The Geometer's Sketchpad: Programming by Geometry
Tourmaline: Text Formatting by Demonstration
A History-Based Macro by Example System
Mondrian: A Teachable Graphical Editor
Triggers: Guiding Automation with Pixels to Achieve Data Access
The AIDE Project: An Application-Independent Demonstrational Environment
A History of Editable Graphical Histories
Graphical Representation and Feedback in a PBD System
PBD Invocation Techniques: A Review and Proposal
A System-Wide Macro Facility Based on Aggregate Events: A Proposal
Making Programming Accessible to Visual Problem Solvers
Using Voice Input to Disambiguate Intent
Characterizing PBD Systems
Demonstrational Interfaces: A Step Beyond Direct Manipulation
Just-in-Time Programming
App. A: A Programming by Demonstration Chronology: 23 Years of Examples
App. B: A Test Suite for Programming by Demonstration
App. C: Glossary
