General Introduction
The functional organization of projections from striate to prestriate visual cortex in the rhesus monkey p. 9
Object vision and spatial vision: Two cortical pathways p. 19
Segregation of form, color, movement, and depth: Anatomy, physiology, and perception p. 24

Concurrent processing streams in monkey visual cortex p. 34
The color-opponent and broad-band channels of the primate visual system p. 42
Oscillatory responses in cat visual cortex exhibit inter-columnar synchronization which reflects global stimulus properties p. 49
Multiple analyses of orientation in the visual system p. 52
Visual properties of neurons in inferotemporal cortex of the macaque p. 83
The functional properties of the light-sensitive neurons of the posterior parietal cortex studied in waking monkeys: Foveal sparing and opponent vector organization p. 99

Direction- and velocity-specific responses from beyond the classical receptive field in the middle temporal visual area (MT) p. 123
Illusory contours and cortical neuron responses p. 145
The analysis of moving visual patterns p. 148
Visual information processing: Artificial intelligence and the sensorium of sight p. 165

Network model of shape-from-shading: Neural function arises from both receptive and projective fields p. 187
A back-propagation programmed network that simulates response properties of a subset of posterior parietal neurons p. 190
Categorical versus coordinate spatial relations: Computational analyses and computer simulations p. 196
Auditory cortex p. 217
A neural map of auditory space in the owl p. 243
Neural axis representing target range in the auditory cortex of the mustache bat p. 247
Magnetic location of cortical activity p. 251
Double representation of the body surface within cytoarchitectonic areas 3b and 1 in "SI" in the owl monkey (Aotus trivirgatus) p. 263
Isolating attentional systems: A cognitive-anatomical analysis p. 295
A cortical network for directed attention and unilateral neglect p. 310
Enhancement of inferior temporal neurons during visual discrimination p. 327
Selective attention gates visual processing in the extrastriate cortex p. 342
Behavioral modulation of visual responses in the monkey: Stimulus selection for attention and movement p. 346
Function of the thalamic reticular complex: The searchlight hypothesis p. 366
Long-lasting potentiation of synaptic transmission in the dentate area of the anaesthetized rabbit following stimulation of the perforant path p. 381
Presynaptic mechanism for long-term potentiation in the hippocampus p. 397
Is there a cell-biological alphabet for simple forms of learning? p. 403
Modeling the neural substrates of associative learning and memory: A computational approach
Simulation of paleocortex performs hierarchical clustering
Gradient following without back-propagation in layered networks
Neuronal firing in the inferotemporal cortex of the monkey in a visual memory task
Neuronal correlate of pictorial short-term memory in the primate temporal cortex
Memory related motor planning activity in posterior parietal cortex of macaque
Mnemonic coding of visual space in the monkey's dorsolateral prefrontal cortex
A memory system in the monkey
Mechanisms of memory
Lasting consequences of bilateral medial temporal lobectomy: Clinical course and experimental findings in H. M.
Implicit memory: History and current status
Memory dysfunction and word priming in dementia and amnesia
The neurological basis of mental imagery: A componential analysis
Localization of cortical areas activated by thinking
Mental rotation of the neuronal population vector
Aspects of a cognitive neuroscience of mental imagery
Some functional effects of sectioning the cerebral commissures in man
Behavioural effects of frontal-lobe lesions in man
Positron emission tomographic studies of the cortical anatomy of single-word processing
Cortical language localization in left, dominant hemisphere
The organization of language and the brain
Evidence for modality-specific meaning systems in the brain
The conceptual status of deep dyslexia: An historical perspective
Surface dyslexia
