Series Foreword
Acknowledgments
A Learnability Paradox
Argument Structure and the Lexicon
The Logical Problem of Language Acquisition
Baker’s Paradox
Attempted Solutions to Baker’s Paradox
Components of the Paradox
Solution #0: Nonsolutions
Solution #1: Variants of Negative Evidence
Subtle Negative Evidence
Nonoccurrence: A Surrogate for Negative Evidence?
Uniqueness: Another Surrogate for Negative Evidence?
Solution #2: Strict Lexical Conservatism
Evidence Against Strict Lexical Conservatism in Children: Spontaneous Speech
Evidence Against Strict Lexical Conservatism in Children: Experiments
Solution #3: Syntactic Representations as Criteria for the Application of Lexical Rules
Representations for Argument Structures
Using Properties of Syntactic Representations to Solve the Learning Problem
Obligatory Versus Optional Arguments
Arguments Versus Nonarguments
Unaccusativity
Other Proposals
Constraints on Lexical Rules
Morphological and Phonological Constraints
Semantic Constraints
Dative
Causative
Locative
Passive
How Semantic and Morphological Constraints Might Resolve Baker’s Paradox
Evidence for Criteria-Governed Productivity
Problems for the Criteria-Governed Productivity Theory
Constraints and the Nature of Argument Structure
Overview: Why Lexical Rules Carry Semantic Constraints
Constraints on Lexical Rules as Manifestations of More General Phenomena
Constraints on Argument Structures That Are Independent of Lexical Rules
Constraints on Grammatical Functions That Are Independent of Particular Argument Structures
Constraints on Verb Choice Are Also Constraints on Interpretation
A Theory of Argument Structure
Background Assumptions
Semantic Conflation Classes as Thematic Cores of Argument Structures
Linking Rules
Lexical Rules
The Locative Alternation
The Dative Alternation
The Causative Alternation
The Active-Passive Relation
On Universality
Possible and Actual Forms
The Problem of Negative Exceptions
Why the Negative Exceptions Exist
Transitive Action Verbs as Evidence for Narrow Subclasses
The Nature of Narrow Conflation Classes
Defining and Motivating Subclasses of Verbs Licensing the Four Alternations
Dativizable Verbs
The Morphological Constraint on the Dative
Locativizable Verbs
Causativizable Verbs
Passivizable Verbs
Passivizable Action Verbs
The Thematic Relations Hypothesis Extended to Agent-Patient Relations
Passivizable
Abstract and Stative Verbs
Other Passivizable Verbs Lacking Concrete Agents and Patients
What Makes the Passive Different from Other Alternations?
The Relation Between Narrow-Range and Broad-Range Rules
Ungrammatical Uses of Lexical Rules in Adult Language
Property-Predicting Versus Existence-Predicting Rules
Why Are Only Narrow-Range Rules Existence-Predicting?
Representation
The Need for a Theory of Lexicosemantic Representation
Is a Theory of Lexical Semantics Feasible?
Skepticism About Decompositional Theories of Word Meaning
Evidence for a Semantic Subsystem Underlying Verb Meanings
A Cross-linguistic Inventory of Components of Verb Meaning
A Theory of the Representation of Grammatically Relevant Semantic Structures
Conceptual Constituents and Functions for Motion Events
Interfacing Semantic Structures with Syntax
Manner of Motion
States
Properties
Extension to Nonlocational Semantic Fields
Actions, Agents, and Patients
A Possible Featural Representation for Basic Predicates
Interevent Relations: Effects, Means, and Coreference
Linking Oblique Arguments
A Family of Causal Relations
Nonphysical Semantic Fields for Acts
Temporal Information
A Remark on Redundancy, Constraints, and Decomposition
Summary of Semantic Machinery
Explicit Representations of Lexical Rules and Lexicosemantic Structures
Representations for the Dative
Representations for the Causative
Representations for the Locative
Representations for the Passive
Summary
Learning
Linking Rules
Problems with Using Innate Linking Rules
Can Linking Rules Form Vicious Circles in Acquisition?
Syntactic Ergativity
Lexical Semantic Structures
Event-Category Labeling
Semantic Structure Hypothesis Testing
Syntactic Cueing of Semantic Structures
Broad Conflation Classes (Thematic Cores) and Broad-Range Lexical Rules
Narrow Conflation Classes and Narrow-Range Lexical Rules
Why Lexical
Abstraction Doesn't Work
Clustering Algorithms and Classwise Indirect Negative Evidence: Would They Work?
Parameterization of Idiosyncratic Lexical Information
Key Facts About Narrow Classes and Rules
A Strong Hypothesis for Narrow-Range Rule Formation
Learning the Variable Ranges of Rules by Focusing on the Changing Arguments
Other Ways of Preventing the Rules from Being Too Narrow
Summary of Learning Mechanisms
Development
Developmental Sequence for Argument Structure Alternations
Early Conservative Usage Preceding Onset of Errors
Overapplication of Argument Structure Alternations
Progression Toward the Adult State
The Unlearning Problem
A Simple Solution to the Unlearning Problem
Why Children Would Sound Different from Adults Even If the Minimalist Solution Is Correct
Children's Argument Structure Changing Rules Are Always Semantically Conditioned
Semantic Constraints on Children's Causatives
Experimental Evidence
Are Productive Transitives in Spontaneous Speech Necessarily Causative?
Choice of Causativized Predicates and Arguments in Causative Errors
Causativization of Transitive Verbs
Semantic Constraints on Children's Datives
Experimental Evidence
Spontaneous Speech
Semantic Constraints on Children's Locatives
Experimental Evidence
Spontaneous Speech
Semantic Constraints on Children's Passives
Experimental Evidence
Spontaneous Speech
Summary of Semantic Constraints on Children's Lexical Rules
Do Children's Errors Have the Same Cause as Adults'? Overall Tendency Toward Conservatism
Experimental Evidence for Conservative Tendencies
Conservative Tendencies in Spontaneous Speech
Evidence That Children Are Ambivalent About Their Own Errors
Summary of Differences Between Children's Errors and Adults' Acquisition of Verb Meaning and Errors in Argument Structure
The Development of Verb Meaning Later Onset and Slower Rate
Underspecified meanings
Overspecified meanings
Biases in Semantic Development
Substitution Errors
Relations Between the Development of Verb Meaning and the Development of Argument Structure
Onset of Errors
Argument Structures in Verb Substitution Errors
Relations Between Biases in Acquiring Verb Semantics and Recurring Errors in Argument Struct...
Experimental Evidence Showing That Semantic Biases Affect Argument Structures
Errors in Understanding Fill-type Verbs
Semantic and Syntactic Errors with Fill-type Verbs in the Same Children
Effects of the Semantics of Newly Learned Verbs
Some Predictions About the Acquisition of Narrow-Range Rules
A Speculation About the Role of Maturation
Summary of Development
Conclusions
A Brief Summary of the Resolution of the Paradox
Argument Structure as a Pointer Between Syntactic Structure and Propositions: A Brief Comparison...
The Autonomy of Semantic Representation
Implications for the Semantic Bootstrapping Hypothesis
Conservatism, Listedness, and the Lexicon
Spatial Schemas and
Abstract Thought
