Approximate Inference Algorithms for Two-Layer Bayesian Networks  p. 533
Optimal Kernel Shapes for Local Linear Regression  p. 540
Large Margin DAGs for Multiclass Classification  p. 547
The Infinite Gaussian Mixture Model  p. 554
v-Arc: Ensemble Learning in the Presence of Outliers  p. 561
Nonlinear Discriminant Analysis Using Kernel Functions  p. 568
An Analysis of Turbo Decoding with Gaussian Densities  p. 575
Support Vector Method for Novelty Detection  p. 582
Greedy Importance Sampling  p. 596
Bayesian Model Selection for Support Vector Machines, Gaussian Processes and Other Kernel Classifiers  p. 603
Leveraged Vector Machines  p. 610
Agglomerative Information Bottleneck  p. 617
Training Data Selection for Optimal Generalization in Trigonometric Polynomial Networks  p. 624
Predictive Approaches for Choosing Hyperparameters in Gaussian Processes  p. 631
On Input Selection with Reversible Jump Markov Chain Monte Carlo Sampling  p. 638
Building Predictive Models from Fractal Representations of Symbolic Sequences  p. 645
The Relevance Vector Machine  p. 652
Support Vector Method for Multivariate Density Estimation  p. 659
Dual Estimation and the Unscented Transformation  p. 666
Correctness of Belief Propagation in Gaussian Graphical Models of Arbitrary Topology  p. 673

A MCMC Approach to Hierarchical Mixture Modelling  p. 680
Data Visualization and Feature Selection: New Algorithms for Nongaussian Data  p. 687
Manifold Stochastic Dynamics for Bayesian Learning  p. 694
The Parallel Problems Server: an Interactive Tool for Large Scale Machine Learning  p. 703

An Oculo-Motor System with Multi-Chip Neuromorphic Analog VLSI Control  p. 710
A Winner-Take-All Circuit with Controllable Soft Max Property  p. 717
A Neuromorphic VLSI System for Modeling the Neural Control of Axial Locomotion  p. 724
Bifurcation Analysis of a Silicon Neuron  p. 731
An Analog VLSI Model of Periodicity Extraction  p. 738
An Oscillatory Correlation Framework for Computational Auditory Scene Analysis  p. 747
Bayesian Modelling of fMRI Time Series  p. 754
Neural System Model of Human Sound Localization  p. 761
Spectral Cues in Human Sound Localization  p. 768
Broadband Direction-Of-Arrival Estimation Based on Second Order Statistics  p. 775
Constrained Hidden Markov Models  p. 782
Online Independent Component Analysis with Local Learning Rate Adaptation  p. 789
Speech Modelling Using Subspace and EM Techniques  p. 796
Search for Information Bearing Components in Speech
Audio Vision: Using Audio-Visual Synchrony to Locate Sounds
Bayesian Reconstruction of 3D Human Motion from Single-Camera Video
Emergence of Topography and Complex Cell Properties from Natural Images using Extensions of ICA
An Information-Theoretic Framework for Understanding Saccadic Eye Movements
Learning Sparse Codes with a Mixture-of-Gaussians Prior
Hierarchical Image Probability (HIP) Models
Scale Mixtures of Gaussians and the Statistics of Natural Images
A SNoW-Based Face Detector
Managing Uncertainty in Cue Combination
Robust Learning of Chaotic Attractors
Image Representations for Facial Expression Coding
Low Power Wireless Communication via Reinforcement Learning
Learning Informative Statistics: A Nonparametric Approach
Kirchoff Law Markov Fields for Analog Circuit Design
Learning the Similarity of Documents: An Information-Geometric Approach to Document Retrieval and Categorization
Constructing Heterogeneous Committees Using Input Feature Grouping: Application to Economic Forecasting
From Coexpression to Coregulation: An Approach to Inferring Transcriptional Regulation among Gene Classes from Large-Scale Expression Data
Churn Reduction in the Wireless Industry
Unmixing Hyperspectral Data
Application of Blind Separation of Sources to Optical Recording of Brain Activity
Reinforcement Learning for Spoken Dialogue Systems
Image Recognition in Context: Application to Microscopic Urinalysis
Generalized Model Selection for Unsupervised Learning in High Dimensions
Learning from User Feedback in Image Retrieval Systems
An Environment Model for Nonstationary Reinforcement Learning
State Abstraction in MAXQ Hierarchical Reinforcement Learning
Approximate Planning in Large POMDPs via Reusable Trajectories
Actor-Critic Algorithms
Bayesian Map Learning in Dynamic Environments
Policy Search via Density Estimation
Neural Network Based Model Predictive Control
Reinforcement Learning Using Approximate Belief States
Coastal Navigation with Mobile Robots
Learning Factored Representations for Partially Observable Markov Decision Processes
Policy Gradient Methods for Reinforcement Learning with Function Approximation
Monte Carlo POMDPs
Index of Authors p. 1071
Keyword Index p. 1075
