Foreword

A Meta-Rule Treatment for English Wh-Constructions

Analysis of Meta-Programs

Metalogic Programming and Direct Universal Computability

A Simple Formulation of the Theory of Metalogic Programming

A Classification of Meta-Level Architectures

Reflection in Constructive and Non-Constructive Automated Reasoning

Processing Techniques for Discontinuous Grammars

Semantically Constrained Parsing and Logic Programming

Negation as Failure: Proofs, Inference Rules and Meta-Interpreters

An Integrated Interpreter for Explaining Prolog's Successes and Failures

Tracing Requirements for Multi-Layered Meta-Programming

The Compilation of Forward Checking Regimes through Meta-Interpretation and Transformation

Using Safe Approximations of Fixed Points for Analysis of Logic Programs

Type Inference by Program Transformation and Partial Evaluation

Complete Sets of Frontiers in Logic-Based Program Transformation

A Treatment of Negation during Partial Evaluation

Issues in the Partial Evaluation of Meta-Interpreters

The Partial Evaluation of Imperative Programs Using Prolog

Prolog Meta-Programming with Soft Databases

What Is a Meta-Variable in Prolog?

Meta-Programming in Prolog through Direct Introspection: A Comparison with Meta-Interpretation Techniques

Design and Implementation of an Abstract MetaProlog Engine for MetaProlog

Qu-Prolog: an Extended Prolog for Meta Level Programming

A Meta-Logic for Functional Programming

Meta-Logic Programming for Epistemic Notions

Algorithmic Debugging with Assertions

The Logical Reconstruction of Cuts as One Solution Operators

Hypergraph Grammars and Networks of Constraints versus Logic Programming and Metaprogramming
