Dedication p. 1
Artificial intelligence in perspective: a retrospective on fifty volumes of the Artificial Intelligence Journal p. 5
History of circumscription p. 23
Autoepistemic logic revisited p. 27
Reflections on the knowledge level p. 31
Probabilistic logic revisited p. 39
A method for managing evidential reasoning in a hierarchical hypothesis space - a retrospective p. 43
Belief networks revisited p. 49
The complexity of constraint satisfaction revisited p. 57
A perspective on assumption-based truth maintenance p. 63
Retrospective on "Interpreting line drawings as three-dimensional surfaces" p. 71
Determining optical flow p. 81
Comment on: "Numerical shape from shading and occluding boundaries" p. 89
From a real chair to a negative chair p. 95
A view on qualitative physics p. 105
Qualitative process theory: twelve years after p. 115
Reasoning with qualitative models p. 125
Qualitative simulation: then and now p. 133
Retrospective on "Causality in device behavior" p. 141
Retrospective on "Diagnostic reasoning based on structure and behavior" p. 149
From Dart to Designworld: a chronicle of research on automated engineering in the Stanford Logic Group p. 159
Categorical and probabilistic reasoning in medicine revisited p. 167
Retrospective on "Production rules as a representation for a knowledge-based consultation program" p. 181
Notes on "Heuristic classification" p. 191
Notes on "Epistemology of a rule-based expert system" p. 197
Prototypical knowledge for expert systems: a retrospective analysis p. 207
Intelligent control p. 213
Retrospective on "The organization of expert systems, a tutorial" p. 221
STRIPS, a retrospective p. 227
DENDRAL and Meta-DENDRAL: roots of knowledge systems and expert system applications p. 233
R1 ("XCON") at age 12: lessons from an elementary school achiever p. 241
Allen Newell: the entry into complex information processing p. 251
Eight reviews of Unified Theories of Cognition and a response (Editorial) p. 261
Book Review of Unified Theories of Cognition (Allen Newell) p. 265
Unified theories of cognition: modeling cognitive competence (Book Review) p. 295
On building integrated cognitive agents: a review of Allen Newell's Unified Theories of Cognition p. 329
