Program Committee
The Association for Logic Programming

Series Foreword
Preface

Referees

Declarative Programming for a Messy World p. 3
Logics and Database Modeling p. 6
Adventures in the Prolog Trade p. 22
Answer Set Planning p. 23
Logic Programming in Oz with Mozart p. 38
Program Analysis, Debugging, and Optimization Using the Ciao System Preprocessor p. 52
From Prolog and Zelda to ToonTalk p. 67
Disjunctive Logic Programs with Inheritance p. 79
Event, Property, and Hierarchy in Order-Sorted Logic p. 94
Temporal Probabilistic Logic Programs p. 109
An Optimized Prolog Encoding of Typed Feature Structures p. 124
A Generic Approach to Monitor Program Executions p. 139
Generating Deductive Database Explanations p. 154
Computing Large and Small Stable Models p. 169
Algebra of Logic Programming p. 184
Semantic Definitions for Normal Open Programs p. 200
Declarative Priority in a Concurrent Logic Language O[subscript N] p. 215
Revising Hull and Box Consistency p. 230
CLAIRE: Combining Sets, Search, and Rules to Better Express Algorithms p. 245
Herbrand Constraint Solving in HAL p. 260
Comparing Trailing and Copying for Constraint Programming p. 275
Stack-splitting: Or-/And-parallelism on Distributed Memory Machines p. 290
Mutable Terms in a Tabled Logic Programming System p. 305
Concurrency in Prolog Using Threads and a Shared Database p. 320
Proving Termination of Input-Consuming Logic Programs p. 335
Bounded Nondeterminism of Logic Programs p. 350
Termination Analysis for Abductive General Logic Programs p. 365
The Relative Complement Problem for Higher-Order Patterns p. 380
Extensionality of Simply Typed Logic Programs p. 395
Lightweight Lemmas in [lamda]Prolog p. 411
Well-founded Abduction via Tabled Dual Programs p. 426
Optimization of Disjunctive Queries p. 441
Well-founded Semantics by Transformation: The Non-ground Case p. 456
Monotonicity in Rule Based Update p. 471
Transforming Inductive Definitions p. 486
Binding-time Analysis for Mercury p. 500
