Program Committee
Association for Logic Programming
Series Foreword
Preface
Referees

Global Variables in Logic Programming p. 3
A Practical Approach to Structure Reuse of Arrays in Single Assignment Languages p. 18
Live-structure Analysis for Logic Programming Languages with Declarations p. 33
Non-Failure Analysis for Logic Programs p. 48
Automatic Termination Analysis of Logic Programs p. 63
Demand-driven and constraint-based automatic left-termination analysis for Logic Programs p. 78
Optimization of Logic Programs with Dynamic Scheduling p. 93
Automatic Compile-time Parallelization of Prolog Programs for Dependent And-Parallelism p. 108
Implementation Mechanisms for Dependent And-Parallelism p. 123
Parallel Evaluation Strategies for Functional Logic Languages p. 138
A Higher Order Rewriting Logic for Functional Logic Programming p. 153
Translating Logic Programs into Conditional Rewriting Systems p. 168
Modularity in Functional-Logic Programming p. 183
Taking I/O Seriously: Resolution Reconsidered for Disk p. 198
Effective Maintenance of Recursive Views: Improvements to the DRed Algorithm p. 213
Capturing Database Dynamics by Deferred Updates p. 226
Total Homeostaticity and Integrity Constraints Restorability Recognition p. 241
Assumption Grammars for Processing Natural Language p. 256
Visualization of And/Or-Parallel Execution of Logic Programs p. 271
Oz Explorer: A Visual Constraint Programming Tool p. 286
Constraint Search Trees p. 301
Solving Small TSPs with Constraints p. 316
A Modular Framework for the Combination of Unification and Built-In Constraints p. 331
A Strong Correspondence between Description Logics and Open Logic Programming p. 346
Disjunctive Logic Programming as Constrained Inferences p. 361
Incorporating a Pruning Strategy into the Computation of Stable Models based on MGTP p. 376

Hybrid Probabilistic Programs p. 391
Calculi for Disjunctive Logic Programming p. 409
Handling Side-effects with Selective Recomputation in AND/OR Parallel Execution Models p. 410
Concurrent Logic Programming and [pi] Calculus p. 411
Connecting Propagators with a Concurrent Constraint Language p. 412
Reasoning on Constraints in Constraint Logic Programming p. 413
Tree Drawing Using Constraint Logic Programming p. 414
Supporting Partial and Complete Sets and Tuples in Deductive Databases p. 415
