

First steps in programming Computers and programming

Data: types, constants and variables

The data type Integer

Towards the complete program

The data type Boolean

Fundamental control structures

Programming methodically

Further simple data types The data type Char

Ordinal types

The data type Real

Arrays and strings Arrays

Packed arrays and strings

Subprograms Functions

Procedures

Methodical programming with subprograms

Further data structures Records

Files

Methodical programming with data structures

Additional topics Sets

Pointers and linked lists

Advanced use of subprograms

The Goto statemen
