Electronic Properties in Semiconductor Heterostructures
Phonons in Low-Dimensional Systems
Theory of Electron Transport in Low-Dimensional Semiconductor Structures
Quantum Wires and Quantum Dots
Quantum Interference in Disordered Electron Systems
Theory of the Quantum Hall Effect
Tunneling in Semiconductor Resonant Structures
Keldysh Formalism and the Landauer Approach
Magneto-Optical Properties of Semiconductor Heterostructures
Electrons in Superlattices
Metallic Superlattices
Phonon Emission, Absorption, and Reflection from a Two-Dimensional Electron Gas
Quantum Adiabatic Electron Transport in Ballistic Conductors
Experiments on Two-Dimensional Wigner Crystals
Artificial Semiconductor Structures: Electronic Properties and Device Applications
Index
