Clinical Dilemmas and Problems in Assessing Prostatic Metastasis to Bone: The Scientific Challenge  p. 1
Comparative Study of Prostatic Carcinoma Bone Metastasis among Japanese in Japan and Japanese Americans and Whites in Hawaii  p. 7
Prostate Cancer in the United States and Japan  p. 17
Analysis of Survival of Prostate Cancer Patients in Japan and the U.S.A.  p. 29
The Cellular Basis for Prostate Cancer Metastasis  p. 39
Cytogenetic and Molecular Genetic Aspects of Human Prostate Cancer: Primary and Metastatic  p. 45
Hemodynamics of Prostate Bone Metastases  p. 77
Role of the Vertebral Venous System in Metastatic Spread of Cancer Cells to the Bone  p. 83
Clinical Significance of the Vertebral Vein in Prostate Cancer Metastasis  p. 93
Effects of Various Growth Factors on a Chondrocyte Differentiation Model  p. 101
Potential Role of HBGF (FGF) and TGF-Beta on Prostate Growth  p. 107
Hormone Refractory Prostatic Cancer: The Role of Radiolabelled Diphosphonates and Growth Factor Inhibitors  p. 115
Localization of Basic Fibroblast Growth Factor (bFGF) in a Metastatic Cell Line (AT-3) Established from the Dunning Prostatic Carcinoma of Rat: Application of a Specific Monoclonal Antibody  p. 131
Use of a Reconstituted Basement Membrane to Study the Invasiveness of Tumor Cells  p. 141
Animal Prostate Carcinoma Models: Limited Potential for Vertebral Metastasis  p. 151
A Model for Studies on Human Prostatic Carcinoma  p. 159
Studies on the Pathogenesis of Osteoblastic Metastases by Prostate Cancer  p. 165
Analysis of Bone Metastasis of Prostatic Adenocarcinoma in 137 Autopsy Cases  p. 173
Nucleolar Organizer Regions in Prostate Cancer  p. 183
Flow Cytometric Analysis of Prostatic Carcinoma with and without Bone Marrow Metastasis  p. 189
Evaluation of the Response of Bone Metastases to Therapy  p. 193
Computed Tomographic Evaluation of Bone Metastases in Prostatic Cancer Patients  p. 197
Magnetic Resonance Imaging of Bone Metastases  p. 205
Bone Marrow MRI in Prostate Cancer  p. 209
Bone Mineral Density for Patients with Bone Metastasis of Prostate Cancer: A Preliminary Report  p. 217
Quantification of Changes in Bone Scans of Patients with Osseous Metastases of Prostatic Carcinoma  p. 233
The Usefulness of Serum Acid Phosphatase in Monitoring Patients with Advanced Prostate Carcinoma  p. 245
Radiation Treatment of Prostate Bone Metastases and the Biological Considerations  p. 255
Clinical Course of Bone Metastasis from Prostatic Cancer Following Endocrine Therapy: Examination with Bone X-Ray  p. 269
Palliative Radiotherapy of Bone Metastasis  p. 277
Clinical Study of Bone-Related Relapse in Prostate Carcinoma  p. 283
Surgical Treatment of Metastatic Tumors of Long Bones and the Spine  p. 295
