Magnetic Resonance Imaging in Epilepsy: The Central Clinical Research Questions
The Anatomical Bases of the Epilepsies and MRI: Implications for MRI
Brain Structure in Epilepsy: The Crucial Role of MRI
MR Spectroscopy in Epilepsy
Mesial Temporal Lobe Structures: Anatomy
Magnetic Resonance Imaging of Hippocampal Sclerosis: Reliability of Visual Diagnosis and Implications for Surgical Treatment
Volumetric MRI Studies of the Hippocampus
Advances in Morphometric and Volumetric Analysis in Temporal Lobe Epilepsy
The Role of MRI Volumetric Studies in the Investigation of Patients with Intractable Epilepsy
The Future Role for MR Imaging in Epilepsy: Morphometry and Volume Analysis
Quantitative Relaxometry of Hippocampal Sclerosis
The Significance of T2 Changes in the Hippocampus
Investigation of Effects of Vigabatrin with Magnetic Resonance Imaging and Spectroscopy In Vivo
MR of Epilepsy: Three Observations
Cortical Dysplasia and Heterotopias
Cortical Dysgenesis in Adults with Epilepsy
Hemimegalencephaly
Agenesis of the Corpus Callosum
The Congenital Bilateral Peri-sylvian Syndrome: Imaging Findings
Focal Cortical Dysplasia in Temporal Lobe Epilepsy: The Role of Magnetic Resonance Imaging
MR in Congenital and Hereditary Metabolic Disorders Associated with Epilepsy
MRI in the Delineation of Genetic Metabolic Disorders
Minimal Developmental Disturbances in Epilepsy and MRI
Correlation of MRI and EEG
Principles of Stereotaxy Applied to MRI and EEG
MRI Stereotactic Placement of Intracranial Electrodes
Frameless Stereotaxy: Technical Aspects
Correlation of MRI and MEG
Volumetric Magnetic Resonance Imaging: Impact on Neuropsychological Studies
MRI and Intellectual Decline in Epilepsy
MRI and SPECT in Epilepsy Surgery
MR-Directed Stereotactic Resections and Per-operative Screening Using Low-Field MRI
Non-malignant Tumoural Lesions
Vascular Anomalies in Epilepsy: MRI Contribution
Magnetic Resonance and Neocortical Epilepsy Atrophies
Application of Spectroscopy to Epilepsy
Proton MR Spectroscopic Imaging in the Investigation of Patients with Temporal Lobe Epilepsy
Proton MR Spectroscopy in the Evaluation of Mesial Temporal Sclerosis
The Potential of Proton MR Spectroscopy for Monitoring: Pathological Alterations of Human Cerebral Metabolism In Vivo
Quantitative Proton MR Spectroscopy of the Human Brain
Image-Guided Proton MR Spectroscopy in Epilepsy
Techniques for Localisation and Signal Improvement in In Vivo Proton and Phosphorus MR Spectroscopy
Proton Observation of $^{13}$C-Labelled Metabolites
Use of Combined $^{13}$C-, $^{19}$F- and $^{31}$P-MR Spectroscopy in Research on Brain Metabolism
Malignant Tumoural Lesions Investigated by MRS
Analysis of Cortical Patterns
Digital Image Processing for Epilepsy
An MRI-Based Probabilistic Atlas of Neuroanatomy
Other Methods: Functional Imaging, Magnetisation Transfer, and Relaxation Times
MR Imaging of Diffusion
Fast Imaging and Serial Scanning
NMR Studies of Brain Activation
Differential Diagnosis of Human Intracranial Tumors In Vivo Using $^1$H MR Spectroscopic Imaging and Feature Space for Spectral Pattern Recognition
