The Aspartic Proteinases: An Historical Overview

The Regulation of Sequential Processing of HIV-1 Gag by the Viral Protease

A Cellular Anti-Apoptosis Protein Is Cleaved by the HIV-1 Protease

Engineering Catalytically Defective Forms of HIV Protease to Modulate Its Activity

The Aspartic Proteinase from Equine Infectious Anaemia Virus

The Effect of Substrates on the Kinetics and the in Vivo Threshold Activity of Mutant HIV-1 Proteases

A Comparison of gag-pol Precursor Cleavage in Naturally Arising HIV Variants

X-Ray Crystallographic Studies of the Structure-Function Relationships of HIV-1 Protease

Optimization of a Macromolecular Inhibitor of HIV-1 Protease

In Vitro Selection and Characterization of VX-478 Resistant HIV-1 Variants

Sensitivity to Inhibition and Catalytic Efficiency of HIV Proteinase Mutants

Computer Assisted Evaluation of Inhibitor Sensitivity to HIV-1 PR Mutants

Investigation of an Allosteric Site of HIV-1 Proteinase Involved in Inhibition by Cu\(^{2+}\)

Analysis of Autoprocessing of Mason-Pfizer Monkey Virus Proteinase in Vitro: Three Active Forms of Proteinase

Subsequent Selfprocessing of Bovine Leukemia Virus Proteinase in Vitro

Mechanism of Action of Aspartic Proteases

Theory and Method of a Priori Computation of Catalytic Acts of Aspartic and Serine Proteinas

Comparison of the Specificity of the Aspartic Proteinases Towards Internally Consistent Sets of Oligopeptide Substrates

Expression of Chimeric Human Aspartic Proteinases

Cathepsin E: The Best Laid Plans of Mice and Men

Biosynthesis and Intracellular Targeting of the Lysosomal Aspartic Proteinase Cathepsin D

An Aspartic Proteinase Expressed in the Equine Placenta

Protein Engineering Aspartic Proteinases: Site-Directed Mutagenesis, Biochemical Characterisation, and X-Ray Analysis of Chymosins with Substituted Single Amino Acid Substitutions and Loop Replacements

Post X-Ray Crystallographic Studies of Chymosin Specificity: The Role of Histidine-Proline Cluster of k-Casein in Catalytic Reactions

Epitope Mapping of Recombinant Human Procathepsin D

Construction of Chimeric Enzymes to Probe Subsite Contributions to Catalytic Specificity

Expression of Multiple Genes for Pregnancy-Associated Glycoproteins in the Sheep Placenta

Mass Spectrometry as a Tool for Studying the Action of Human Aspartic Proteases on Peptides and Proteins

Skin Surface Proteolytic Activity: Partial Characterization and Identification

Cathepsin E in the Central Nervous System

Detailed Analysis of Human Cathepsin E Prime Region Specificity

Proteolytic and Non-Proteolytic Activation of Prorenin
The Roles of the Basic Residues in the Prosegment of Aspergillopepsinogen I  p. 239
Activation Mechanism of Pepsinogen as Compared to the Processing of HIV Protease gag-pol Precursor Protein  p. 245
Cardosinogen A: The Precursor Form of the Major Aspartic Proteinase from Cardoon  p. 253
Crystal Structure of Human Pepsinogen A  p. 259
Crystallographic Studies of an Activation Intermediate of Human Gastricsin  p. 265
Aspergillus niger Acid Proteinase A: Structure and Function  p. 275
Crystal Structure of the Rhizomucor miehei Aspartic Proteinase  p. 283
Rhizomucor miehei Aspartic Proteinases Having Improved Properties  p. 293
Structure of Secreted Aspartic Proteinases from Candida: Implications for the Design of Antifungal Agents  p. 297
Yapsin I: Structure, Biosynthesis, and Specificity  p. 315
Bacterial Aspartic Proteinases as Novel Antibiotic Targets  p. 321
Structural Thermodynamic Study of the Binding of Renin Inhibitors to Endothiapepsin  p. 325
Development and Testing of Inhibitors of Candida Aspartic Proteinases  p. 329
Primary Substrate Specificities of Secreted Aspartic Proteases of Candida albicans  p. 335
Functional Aspects of Secreted Candida Proteinases  p. 339
Substrate Specificity of Non-Pepsin-Type Acid Proteinase, Aspergillus niger Proteinase A  p. 345
Pepstatin-Insensitive Carboxyl Proteinases from Prokaryotes: Catalytic Residues and Substrate Specificities  p. 349
Overcoming the Unfavourable Entropic Contribution of Ligand Binding with a Macrocyclic Inhibitor Bound to Penicillopepsin  p. 355
Structural Analysis of Plasmepsin II: A Comparison with Human Aspartic Proteases  p. 363
Screening Aspartyl Proteases with Combinatorial Libraries  p. 375
Thermodynamics and Proton Uptake for Pepstatin Binding to Retroviral and Eukaryotic Aspartic Proteases  p. 381
Expression, Purification, and Characterization of the Recombinant Pepsin Inhibitor from Ascaris suum  p. 387
X-Ray Crystallographic Studies of the Complex between Porcine Pepsin and the Aspartic Proteinase Inhibitor PI-3 from the Nematode Ascaris suum  p. 391
Studies on Plasmepsins I and II from the Malarial Parasite Plasmodium falciparum and Their Exploitation as Drug Targets  p. 397
Plasmepsins I and II from the Malarial Parasite Plasmodium falciparum  p. 407
Structural and Functional Aspects of Cardosins  p. 423
Molecular Cloning of Aspartic Proteinases from Flowers of Cynara cardunculus Subsp. flavescens Cv. Cardoon and Centaurea calcitrapa  p. 435
Aspartic Proteinases and Inhibitors in Plant Pathogenesis  p. 441
Acid Proteinase from Nepenthes distillatoria (Badura)  p. 453
A Comparative Study on the Aspartic Proteinases from Different Species of Cynara  p. 459
An Aspartic Proteinase from Flowers of Centaurea calcitrapa: Purification, Characterization, Molecular Cloning, and Modelling of Its Three-Dimensional Structure  p. 465
