Effect of Prior O₂ Breathing on Hypoxic Hypercapnic Ventilatory Responses in Humans p. 1
Inhibitory Dopaminergic Mechanisms Are Functional in Peripherally Chemodenervated Goats p. 7
Effect of 8 Hours of Isocapnic/Poikilocapnic Hypoxia on the Ventilatory Response to CO₂ p. 17
Ventilatory Responses to Hypoxia after 6 Hours Passive Hyperventilation in Humans p. 21
Ventilatory Effects of 8 Hours of Isocapnic Hypoxia with and without [beta]-Blockade p. 25
Modulation of Ventilatory Sensitivity to Hypoxia by Dopamine and Domperidone before and after Prolonged Exposure to Hypoxia in Humans p. 29
Changes in Respiratory Control during and after 48 Hours of Both Isocapnic and Poikilocapnic Hypoxia in Humans p. 33
Chemoreflex Effects of Low Dose Sevoflurane in Humans p. 35
Dynamics of the Cerebral Blood Flow Response to Sustained Euoxic Hypocapnia in Humans p. 37
Evidence for a Central Role of Protein Kinase C in Modulation of the Hypoxic Ventilatory Response in the Rat p. 45
Synaptic Connections to Phrenic Motoneurons in the Decerebrate Rat p. 51
Phrenic Nerve Response to Glutamate Antagonist Microinjection in the Ventral Medulla p. 61
Axonal Projections from the Pontine Parabrachial-Kolliker-Fuse Nuclei to the Botzinger Complex as Revealed by Antidromic Stimulation in Cats p. 67
Hebbian Covariance Learning: A Nexus for Respiratory Variability, Memory, and Optimization? p. 73
Performances of Different Control Laws for Automatic Oxygen Supply for COPD Patients p. 85
Techniques for Assessing the Shape of Respiratory Flow Profiles from Data Containing Marked Breath-by-Breath Respiratory Variability p. 93
The Expiratory Flow Pattern and the Neuromuscular Control of Breathing in Cats p. 95
Phase Relations between Rhythmical Forearm Movements and Breathing under Normocapnic and Hypercapnic Conditions p. 101
Temporal Correlation in Phrenic Neural Activity p. 111
Methods of Assessing Respiratory Impedance during Flow Limited and Non-Flow Limited Inspirations p. 119
Human Ventilatory Response to Immersion of the Face in Cool Water p. 127
Ventilatory Response to Passive Head Up Tilt p. 133
Do Sex-Related Differences Exist in the Respiratory Pharmacology of Opioids? p. 141
Are the Respiratory Responses to Changes in Ventilatory Assist Optimized? p. 147
Selective Depression of Peripheral Chemoreflex Loop by Sevoflurane in Lightly Anesthetized Cats p. 155
Pulmonary Rapidly Adapting Receptors and Airway Constriction p. 159
The Effect of Eucapnic and Isocapnic Volitional Hyperventilation upon Breathlessness p. 167
Influence of Low Dose Dopamine on the Heart Rate and Ventilatory Responses to Sustained Isocapnic Hypoxia p. 73
