Equation of State for Binary Ionic Plasmas, Fluid and Solid Physics  p. 1
Density Functional Theory in 1997  p. 9
Equation of State of Partially-Ionized Plasmas  p. 15
Metallization of Fluid Hydrogen at 140 GPa (1.4 Mbar)  p. 25
Electrolyte Criticality and Generalized Debye-Huckel Theory  p. 33
Ordering in Classical Coulombic Systems  p. 43
Electron Correlations in Coulomb Systems in 2 and 3 Dimensions  p. 49
Collective Excitations in a Quark-Gluon Plasma  p. 65
Hohlraum Targets Driven by Cluster Ion Beams for Inertial Confinement Fusion  p. 73
Dense Hydrogen at High and Low Temperatures  p. 81
Kinetic Theory of Ionization and Recombination Rates for Dense Quantum Plasmas  p. 95
Response Functions for Electron-Ion Strongly Coupled Plasmas  p. 103
Fluctuations in Multicomponent Systems  p. 117
Investigations of Condensed Matter by Inelastic X-Ray Scattering with High Energy Resolution  p. 123
Rubidium from a Liquid Metal to a Plasma  p. 129
Anomalous Phase Diagram in Simplest Plasma Model  p. 135
 Thermodynamic Properties of the Mixture He-Hg at High Temperatures and Pressures  p. 139
The Atomic-Molecular Transition in Expanded Liquid Rubidium  p. 143
 Ionic Model for Liquid Uranium Dioxide  p. 147
 Thermodynamic and Structural Properties of Strongly Coupled Plasma Mixtures from the Perturbative HNC Equation  p. 153
 Statistical Mechanics of Highly Charged Ions in NLTE Plasmas  p. 159
 Advances in the Calculation of Virial Expansions for Quantum Plasmas up to Third Order in the Density  p. 165
 Unified Kinetic Theory for Fluid and Crystal Phases  p. 171
 Dust Crystals in Plasmas  p. 175
 Dust Dynamics in Planetary Magnetospheres  p. 179
 Collective Processes in Strongly Coupled Dusty Plasmas  p. 183
 Lattice Waves in Plasma Crystals  p. 187
 Structural Transitions in Confined Yukawa System as a Model of Dusty Plasmas and Charge Stabilized Colloidal Suspensions  p. 193
 Numerical Simulation of Gravitoelectrodynamics in Dusty Plasmas  p. 199
 Relaxation of Dusty Plasmas  p. 203
 Transition from 3-Dimensional Coulomb Crystals to a 2-Dimensional One in a Dusty Plasma  p. 207
 Collective Modes in Strongly Coupled Dusty Plasmas  p. 211
 Expanding Plasma Layers with Dust Particles  p. 215
 Non-Linear Sheaths with Dust Particles  p. 221
 From Cold Dusty Plasmas to Hot Microplasmas X-Ray Dust  p. 225
 On the Lower Limit of Spoke Particle Radii  p. 231
 MD Simulations of Dusty Plasma Crystal Formation: Preliminary Results  p. 237
 Heating and Melting of the Dust Crystal in RF Discharge: Non-Linear Analysis  p. 241
