

Preface

Prologue: the cost of a nail

Atoms, molecules and crystals

The crystal structure of metals

Casting processes

Mechanical testing

Non-destructive testing

Mechanical deformation and recrystallisation of metals

The mechanical shaping of metals

Alloys

Equilibrium diagrams

Practical microscopy

Iron and steel

The heat-treatment of plain-carbon steels

Alloy steels

The surface-hardening of steels

Cast iron

Copper and its alloys

Aluminium and its alloys

Other non-ferrous metals and alloys

Plastics, materials and rubbers

The structure and properties of plastic materials

Ceramics

Glasses

Composite materials

Fibre-reinforced composite materials

The environmental deterioration of materials

Methods of joining materials

The choice of materials and processes

Appendix

Index
