Foreword p. vii
Contributing Authors p. xi
Query Processing Over The Grid: The Role Of Workflow Management p. 1
From Orc Models To Distributed Grid Java Code p. 13
Using Cliques Of Nodes To Store Desktop Grid Checkpoints p. 25
EDGeS: The Common Boundary Between Service And Desktop Grids p. 37
P2P-based Job Assignment For Public Resource Computing p. 49
Estimating The Size Of Peer-To-Peer Networks Using Lambert's W Function p. 61
Comparative Evaluation Of The Robustness Of DAG Scheduling Heuristics p. 73
Prototype Implementation Of A Demand Driven Network Monitoring Architecture p. 85
A Scalable Architecture For Discovery And Planning In P2P Service Networks p. 97
Performance Visualization Of Grid Applications Based On OCM-G And Paraver p. 109
Analysing Orchestrations Using Risk Profiles And Angel-Daemon Games p. 121
Towards Coordinated Data Management For High-Performance Distributed Multimedia Content Analysis p. 133
Towards A Standards-Based Grid Scheduling Architecture p. 147
Dynamic Service-Based Integration Of Mobile Clusters In Grids p. 159
Comparison Of Multi-Criteria Scheduling Techniques p. 173
Comparison Of Centralized And Decentralized Scheduling Algorithms Using GSSIM Simulation Environment p. 185
A Data-Centric Security Analysis Of ICGrid p. 197
A Framework For Resource Availability Characterization And Online Prediction In The Grids p. 209
A Grid Environment For Real-Time Multiplayer Online Games p. 225
IANOS: An Intelligent Application Oriented Scheduling Framework For An HPCN Grid p. 237
On Consistency Of Data In Structured Overlay Networks p. 249
LooPo-HOC: A Grid Component with Embedded Loop Parallelization p. 261
Implementing Dynamic Querying Search in k-ary DHT-based Overlays p. 275
Author Index p. 287
