Algebraic Logic for Software Reliability

Event Spaces and their Linear Logic p. 3

Algebraic Specification at Work p. 26

On the Reusability of Specifications and Implementations p. 43

Selecting Reusable Components using Algebraic Specifications p. 57

The Combination of Specifications and the Induced Relations in Object Oriented Programs p. 70

Algebraic Design of Parallel Systems

MEC: A System for Constructing and Analysing Transition Systems p. 81

Algebraic Semantics of Real-Time Process Specifications p. 83

Structure of Concurrency p. 98

On Rewriting Behavioural Semantics in Process Algebras p. 108

Modeling Concurrency with AND/OR Algebraic Theories p. 117

Type Consistency Checking for Concurrent Independent Processes p. 132

Specification of Software Systems

Theory of Algebraic Module Specification including Behavioural Semantics and Constraints p. 145

Clean Algebraic Exceptions with Implicit Propagation p. 173

ACT TWO: An Algebraic Module Specification and Interconnection Language p. 187

Towards a Theory of Binding Structures: An Abstract Algebra p. 201

Proving the Correctness of Algebraically Specified Software: Modularity and Observability Issues p. 216

Construction of System Software

A Formal Approach to Software Testing p. 243

A Case Study Towards Algebraic Verification of Code Generation p. 254

TwoLev: A Two Level Scanner p. 264

Deriving Incremental Implementations from Algebraic Specifications p. 277

Languages Polynomial in the Input Plus Output p. 287

Reasoning about Software Development

Polynomial Relators p. 303

On Adding Algebraic Theories with Induction to Typed Lambda Calculi p. 327

Extracting Recursive Programs in Type Theory p. 341

Using Algebraic Specification in Floyd-Hoare Assertions p. 350

Studies on the Ground Convergence Property of Conditional Theories p. 363

Solving Divergence in Knuth-Bendix Completion by Enriching Signatures p. 377

Tools for Software Development

Efficient Algebraic Operations on Programs p. 393

The PROSPECTRA System: A Unified Development Framework p. 421

Tools for Algebraic Distributed System Design p. 434

A Framework for Dexterous Manipulation using Lie Algebras p. 443

Pattern Matching: A Sheaf-Theoretic Approach p. 456

Integration of Semantical Verification Conditions in a Specification Language Definition p. 467
