Dimethyl Sulphide (DMS) and its Oxidation to Sulphur Dioxide Downwind of an Ocean Iron Fertilization Study, SERIES: A Model for DMS Flux

Aerosols as Atmospheric Contaminants

Aerosol Modelling with CAMX4 and PMCAMX: A Comparison Study

Source Apportionment of Primary Carbonaceous Aerosol Using the Community Multiscal... Air Quality Model

Urban Population Exposure to Particulate Air Pollution Induced by Road Transport

Numerical Simulation of Air Concentration and Deposition of Particulate Metals

Emitted from a Copper Smelter and a Coal Fired Power Plant During the 2000 Field Experiments on Characterization of Anthropogenic Plumes

Aerosol Production in the Marine Boundary Layer Due to Emissions from DMS: Study Based on Theoretical Scenarios Guided by Field Campaign Data

Modelling the Atmospheric Transport and Environmental Fate of Persistent Organic Pollutants in the Northern Hemisphere using a 3-D Dynamical Model

PM-Measurement Campaign HOVERT: Transport Analysis of Aerosol Components by use of the CTM REM-CALGRID

Direct Radiative Forcing due to Anthropogenic Aerosols in East Asia During 21-25 April 2001

Modelling Fine Aerosol and Black Carbon over Europe to Address Health and Climate Effects

An Approach to Simulation of Long-Range Atmospheric Transport of Natural Allergens: An Example of Birch Pollen

Cloud Chemistry Modeling: Parcel and 3D Simulations

A Test of Thermodynamic Equilibrium Models and 3-D Air Quality Models for Predictions of Aerosol $\text{NO}_3^-$

New Developments

Comparison of Aggregated and Measured Turbulent Fluxes in an Urban Area

Ensemble Dispersion Modeling: "All for One, One for All!"

Linking the ETA Model with the Community Multiscale Air Quality (CMAQ) Modeling System: Ozone Boundary Conditions

Mixing in Very Stable Conditions

Air Quality Ensemble Forecast Over the Lower Fraser Valley, British Columbia

Developments and Results from a Global Multiscale Air Quality Model (GEM-AQ)

A Variable Time-Step Algorithm for Air Quality Models

Temporal Signatures of Observations and Model Outputs: Do Time Series Decomposition Methods Capture Relevant Time Scales?

Wind Tunnel Study of the Exchange Between a Street Canyon and the External Flow

An Example of Application of Data Assimilation Technique and Adjoint Modelling to an Inverse Dispersion Problem Based on the ETEX Experiment

Micro-Swift-Spray (MSS): A New Modelling System for the Simulation of Dispersion at Microscale. General Description and Validation

New Developments on RAMS-Hg Model

Adaptation of Analytic Diffusivity Formulations to Eulerian Grid Model Layers of Finite Thickness

Particulate Matter Source Apportionment Technology (PSAT) in the CAMx Photochemical Grid Model

Model Assessment and Verification
Testing Physics and Chemistry Sensitivities in the U.S. EPA Community Multiscale Air Quality Modeling System (CMAQ)  p. 495
Real-Time Regional Air Quality Modelling in Support of the ICARTT 2004 Campaign  p. 505
High Time-Resolved Comparisons for In-Depth Probing of CMAQ Fine-Particle and Gas Predictions  p. 515
Sensitivity Analysis of the EUROS Model for the 2003 Summer Smog Episode in Belgium  p. 525

A Performance Evaluation of the 2004 Release of Models-3 CMAQ  p. 534
Objective Reduction of the Space-Time Domain Dimensionality for Evaluating Model Performance  p. 543
Cloud Processing of Gases and Aerosols in a Regional Air Quality Model (AURAMS): Evaluation Against Aircraft Data  p. 553
Evaluation of an Annual Simulation of Ozone and Fine Particulate Matter over the Continental United States - Which Temporal Features are Captured?  p. 562
Evaluation of CMAQ PM Results Using Size-resolved Field Measurement Data: The Particle Diameter Issue and Its Impact on Model Performance Assessment  p. 571
The U.K. Met Office's Next-Generation Atmospheric Dispersion Model, NAME III  p. 580
An Operational Evaluation of ETA-CMAQ Air Quality Forecast Model  p. 590
AURAMS/Pacific2001 Measurement Intensive Comparison  p. 599
Analyzing the Validity of Similarity Theories in Complex Topographies  p. 608
Siting and Exposure of Meteorological Instruments at Urban Sites  p. 615
The Effect of the Street Canyon Length on the Street Scale Flow Field and Air Quality: A Numerical Study  p. 632
Limitations of Air Pollution Episodes Forecast due to Boundary-Layer Parameterisations Implemented in Mesoscale Meteorological Models  p. 641
Posters Role of Atmospheric Models in Air Pollution Policy and Abatement Strategies  p. 653

Use of Lagrangian Particle Model Instead of Gaussian Model for Radioactive Risk Assessment in Complex Terrain  p. 653
Study of Air Pollutant Transport in Northern and Western Turkey  p. 656
Source Term Assessment from Off-Site Gamma Radiation Measurements  p. 659
Determination of the Impact of Different Emission Sources in the Air Quality Concentrations: The Teap Tool  p. 662
Advanced Atmospheric Dispersion Modelling and Probabilistic Consequence Analysis for Radiation Protection Purposes in Germany  p. 664
Integrated Regional Modeling  p. 669
Comparison of Different Turbulence Models Applied to Modelling of Airflow in Urban Street Canyon and Comparison with Measurements  p. 671
Pollutant Dispersion in a Heavily Industrialized Region: Comparison of Different Models  p. 671
Study of Odor Episodes Using Analytical and Modeling Approaches  p. 674
Application of Back-Trajectory Techniques to the Characterization of the Regional Transport of Pollutants to Buenos Aires, Argentina  p. 677
Effects of Climate Change on Air Quality  p. 683
Application of Source-Receptor Techniques to the Assessment of Potential Source Areas in Western Mediterranean  p. 683
New Developments
Influence of the Autocorrelation Function in the Derivation of Fundamental Relationship $\varepsilon \infty \sigma_v^2/C_0T_{Lv}$ p. 689

A Model for Describing the Evolution of the Energy Density Spectrum in the Convective Boundary Layer Growth p. 692

Simulation of the Dispersion of Pollutants Considering Nonlocal Effects in the Solution of the Advection-Diffusion Equation p. 695

Concentration Fluctuations in Turbulent Flow p. 698

Model Assessment and Verification

Skill's Comparison of Three Canadian Regional Air Quality Models Over Eastern North America for the Summer 2003 p. 703

Region-Based Method for the Verification of Air Quality Forecasts p. 708

On the Comparison of Nesting of Lagrangian Air-Pollution Model Smog to Numerical Weather Prediction Model ETA and Eulerian CTM CAMX to NWP Model MM5: Ozone Episode Simulation p. 711

High Resolution Air Quality Simulations with MC2-AQ and GEM-AQ p. 714

Nonlinear Models to Forecast Ozone Peaks p. 721

Evaluation of MC2 Profile Data During the Pacific2001 Field Study p. 724

List of Participants p. 727
