General concepts about oxidative stress p. 1
Lipoproteins and oxidation p. 17
Pathogenesis of atherosclerosis p. 49
The antioxidant hypothesis p. 87
Reactive oxygen species as mediators of signal transduction in cardiovascular diseases p. 103
Biomarkers of oxidant stress in vivo: oxidative modifications of lipids, proteins and DNA p. 131
Pharmacological compounds with antioxidant activity p. 167
Antioxidant nutrients and antioxidant nutrient-rich foods against coronary heart disease p. 195
Antioxidants and chronic vascular disease: animal studies p. 227
Synthetic antioxidants and atherosclerosis: human studies p. 255
Antioxidants and endothelial function: human studies p. 279
Antioxidant vitamins and cardiovascular disease p. 305
Antioxidants and restenosis after percutaneous coronary intervention: animal studies p. 327
Antioxidants and restenosis after percutaneous coronary intervention: human studies p. 337
Oxidative stress in hypertension p. 363
Oxidative stress in the development of diabetes and its complications p. 381
Anti-inflammatory and antioxidant functions of high density lipoproteins p. 399
Oxidative stress in heart failure p. 437
Use of antioxidants in patients with congestive heart failure p. 451
