Cellular Responses in Sepsis
The Role of Toll-like Receptors in Sepsis  p. 3
The Emerging Role of RAGE in Sepsis  p. 14
Oxidative Stress in Sepsis: Implications on Liver Protein Patterns and Analysis via Modified Proteomics Technology  p. 23
HSP90: The Unsung Villain of Sepsis?  p. 35
The Role of Extracellular Heat Shock Proteins in Cellular Inflammation and Injury  p. 45
Quantitative in vivo Protein Synthesis as a Measure of Immune Function  p. 52
Fluid Resuscitation and Immunomodulation in the Critically Ill  p. 68
Cellular Dysfunction
Mitochondrial Dysfunction and Critical Illness Myopathy  p. 79
Lactic Acidosis and Hyperlactatemia  p. 88
Cardiovascular Dysfunction
Physiology and Pathophysiology of the Natriuretic Peptide System  p. 101
Heart Failure as a Co-Morbidity in the ICU  p. 110
Hemodynamic Monitoring
Intensive Care Echocardiography  p. 131
Intrathoracic Blood Volume: Clinical Applications  p. 142
Hemodynamic Management Guided by Esophageal Doppler  p. 153
Less Invasive Cardiac Output Monitoring: Characteristics and Limitations  p. 162
Pulse Pressure Analysis  p. 176
Pulse Pressure Variations in Managing Fluid Requirement: Beware The Pitfalls!  p. 185
Minimally Invasive Hemodynamic Monitoring Using the Pressure Recording Analytical Method  p. 192
Coagulopathies
Thrombotic Microangiopathy Syndrome in the ICU  p. 205
Altered Functionality of von Willebrand Factor in Sepsis and Thrombocytopenia: Potential Role of ADAMTS-13  p. 219
Coagulopathy in the Critically Injured Patient  p. 232
Critical Bleeding in Blunt Trauma Patients  p. 244
Trauma: Bleeding, Coagulopathy and Blood Component Transfusion  p. 255
Hemostatic Resuscitation  p. 265
Effects of Plasma Substitutes on Coagulation  p. 279
Blood Transfusions
Transfusion as a Risk Factor for ALI and ARDS  p. 289
Red Blood Cell Desialylation in Critically Ill Patients: An Underestimated Cause of Anemia  p. 297
Cardiopulmonary Resuscitation
Clinical Predictors of Physiological Deterioration and Subsequent Cardiorespiratory Arrest Among Hospitalized Patients  p. 309
Cardiocerebral Resuscitation: A Better Approach to Out-of-Hospital Cardiac Arrest  p. 316
Induced Hypothermia for Neuroprotection: Understanding the Underlying Mechanisms p. 328

Acute Lung Injury

Hyaluronan in Acute Lung Injury p. 349

Aspiration-induced Lung Injury: Experimental and Human Studies p. 359

Pulmonary Edema in Organ Donors and Lung Transplant Recipients: Is There a Role for Beta-adrenergic Agonists? p. 366

Respiratory Support

Current Concepts of Airway Management in the ICU and the Emergency Department p. 377

Use of Continuous Positive Airway Pressure in Critically Ill Patients p. 392

Non-invasive Respiratory Support in Pre-term Neonates and Pediatric Patients with Respiratory Failure p. 400

Fast and Slow Compliance: Time, in Addition to Pressure and Volume, is a Key Factor for Lung Mechanics p. 415

Does Ventilator-induced Lung Injury Initiate Non-pulmonary Organ Dysfunction? p. 424

Monitoring in Respiratory Failure

Electrical Impedance Tomography and its Perspectives in Intensive Care Medicine p. 437

Electrical Impedance Tomography for Monitoring of Regional Ventilation in Critically Ill Patients p. 448

Volumetric Capnography for Monitoring Lung Function during Mechanical Ventilation p. 458

Monitoring Respiratory Drive and Respiratory Muscle Unloading during Mechanical Ventilation p. 468

Weaning from Mechanical Ventilation

Weaning from Mechanical Ventilation p. 477

Liberation from Mechanical Ventilation in Acutely Brain-injured Patients p. 486

Non-invasive Ventilation for Respiratory Failure after Extubation p. 494

Burn Injury

Importance of Airway Management in Burn and Smoke Inhalation-induced Acute Lung Injury p. 505

Metabolic Changes Following Major Burn Injury: How to IMprove Outcome p. 514

Antibiotic Dosing in Burn Injury: Should We be Looking at the Tissues More Closely? p. 525

Metabolic Support

Defining Relative Adrenal Insufficiency in the Critically Ill: The ACTH Test Revisited p. 539

Enteral Nutrition in the Critically Ill: Should We Feed into the Small Bowel? p. 552

Tight Energy Balance Control for Preventing Complications in the ICU p. 561

Bacteriological Problems

Acute Pneumonia and Importance of Atypical Bacteria p. 571

Antibiotic Resistance in the Intensive Care Unit p. 582

Fungal Infections

Systemic Candida Infection in the ICU p. 595

Candida Colonization Index in the Management of Critically Ill Patients p. 604

Antifungal Therapy in Surgical ICU Patients p. 613
