Privacy and Privacy-Enhancing Technologies I

Improving Availability of Emergency Health Information without Sacrificing Patient Privacy p. 1

Ensuring Privacy for Buyer-Seller E-Commerce p. 13

A General Certification Framework with Applications to Privacy-Enhancing Certificate Infrastructures p. 25

Security in Mobile and Ad Hoc Networks

Authenticated Query Flooding in Sensor Networks p. 38

Identity Based Message Authentication for Dynamic Networks p. 50

Providing Authentication and Access Control in Vehicular Network Environment p. 62

Trust and Security Management

A Framework for Web Services Trust p. 74

Trust: An Element of Security p. 87

Privacy Enhancing Technologies II

A Methodology for Designing Controlled Anonymous Applications p. 111

Design Options for Privacy-Respecting Reputation Systems within Centralised Internet Communities p. 123

Protecting (Anonymous) Credentials with the Trusted Computing Group's Trusted Platform Modules V1.2 p. 135

Attacks, Vulnerability Analysis, and Tools

Analysis and Improvement of Anti-Phishing Schemes p. 148

CAT - A Practical Graph &amp; SDL Based Toolkit for Vulnerability Assessment of 3G Networks p. 158

Protecting Web Services from DOS Attacks by SOAP Message Validation p. 171

Access Control and Authentication I

A Flexible and Distributed Architecture to Enforce Dynamic Access Control p. 183

A Paradigm for Dynamic and Decentralized Administration of Access Control in Workflow Applications p. 196

CAS++: An Open Source Single Sign-on Solution for Secure E-services p. 208

Security Protocols

A Synchronous Multi-Party Contract Signing Protocol Improving Lower Bound of Steps p. 221

On the Cryptographic Key Secrecy of the Strengthened Yahalom Protocol p. 233

Sealed-Bid Micro Auctions p. 246

Intrusion Detection

Detecting Known and Novel Network Intrusions p. 258

Evaluating Classifiers for Mobile-Masquerader Detection p. 271

VisFlowCluster-IP: Connectivity-Based Visual Clustering of Network Hosts p. 284

Usability and Awareness

A Usability Study of Security Policy Management p. 296

Considering the Usability of End-User Security Software p. 307

Utilizing the Common Criteria for Advanced Student Research Projects p. 317

Privacy Enhancing Technologies III
