Pathobiochemical Changes of the Arterial Wall at the Inception of Atherosclerosis p. 1

Angiogenic Processes in the Pathogenesis of Human Coronary Atherosclerosis p. 47

Differentiation and Role of Macrophages in the Early Human Atherosclerotic Plaque p. 59

Lipoprotein Receptors on Macrophages and Smooth Muscle Cells p. 73

In Situ Localization and Distribution Pattern of Apolipoproteins in Arterial Walls: A Comparative Study in Atherosclerosis and Renal Transplant Arteriopathy p. 125

Collagens in Atherosclerotic Vessel Wall Lesions p. 163

Metabolism of Fibromuscular and Atheromatous Plaques in an Experimental Model: Causal Mechanisms for the Development of Intimal Necrosis p. 193

Parallels Between Renal Transplant Arteriopathy and Atherosclerosis in Respect of Functional Morphology p. 223

Subject Index p. 253
