Preface

Introduction p. 1

Systems and Architectures for Instruction p. 11

Designing Instructional Computing Systems for Meaningful Learning p. 19

Representing Curriculum and Designing Instructional Tasks p. 85

The Search for Adaptability, Flexibility, and Individualization: Approaches to Curriculum in Intelligent Tutoring Systems p. 91

The Curriculum and Instructional Tasks: Goals, Strategies, and Tactics for Interactive Learning p. 123

Environments to Support Learning p. 147

Exploratory Multi-media Environments p. 155

Technological Support for the Learning and Doing of Design p. 173

Diagnosing Students' Learning and Adjusting Plans for Instruction p. 201

Towards a Computational Model of Tutoring p. 209

Phenomenographic Research and the Design of Diagnostic Strategies for Adaptive Tutoring Systems p. 233

Models of Students' Metacognition, Motivation, and Learning Strategies p. 249

Metacognitive Models of Learning and Instructional Systems Design p. 257

The Language Shift: a Mechanism for Triggering Metacognitive Activities p. 287

Student-System Interactions p. 317

Nobile: User Model Acquisition in a Natural Laboratory p. 325

State-of-the-Art Instructional Computing Systems that Afford Instruction and Bootstrap Research p. 349

Synthesis p. 381

Synthesizing Instructional and Computational Science p. 383

Contributors p. 402

Subject Index p. 403
