High-Temperature Superconductors in 1992 Welcome Address

General Properties, Preparation, Structure

Charge Dynamics in Metallic CuO\(_2\) Layers

Superconductivity in the Infinite-Layer Phase Stabilized Under High Pressure

Crystal Chemistry and Superconductivity in \([\text{actual symbol not reproducible}]\)

Superconducting Mixed-Metal Oxide Compounds of the Type \([\text{actual symbol not reproducible}], \text{Ln} = \text{Sm}, \text{Eu}, \text{M} = \text{Nb}, \text{Ta}\)

Applications, Film Preparation

High-T\(_c\) Superconductivity: Present Status of Applications

Recent High-T\(_c\)-SQUID Developments

Epitaxial YBCO Films on MgO, SrTiO\(_3\), Si, and GaAs by Thermal Coevaporation

Preparation and Patterning of (110) Oriented YBaCuO Thin Films

[\text{actual symbol not reproducible}] Superlattices: Properties of Ultrathin [\text{actual symbol not reproducible}] Layers

Synthesis of New HTS by Pulsed Laser Deposition

Epitaxial Growth of Thin-Film [\text{actual symbol not reproducible}] on LaAlO\(_3\)[001], NdGaO\(_3\)[001] and MgO(001)

Transport Properties, Thermal Properties

Aspects of Quantum Coherence in Superconducting Rings: Flux Quantisation in a Heavy Fermion/Niobium Hybrid Ring and the Origin of Noise in a HTC DC SQUID

Effect of Thermodynamic Fluctuations on the Transport Properties in YBaCuO Thin Films

Metallic Weak-Link Character of Grain Boundaries in High-T\(_c\) Materials

The Chemical Potential and Thermodynamic Properties of Narrow-Band Superconductors

Nonequilibrium Properties of HTSC Under Microwave Irradiation

Hall Effect of Epitaxial [\text{actual symbol not reproducible}] Films

Anomalous Thermoelectric Power of the High-T\(_c\) Materials in Normal State: Both Copper Oxides and C\([\text{subscript 60}]\) Fullerene

On the Valency of Pr in [\text{actual symbol not reproducible}]

Anisotropy of Transport Properties of HTSC Monocrystals

High-Energy Spectroscopies

On the Surface-Derived State of Cleaved [\text{actual symbol not reproducible}] Single Crystals

Investigation of the Electronic Structure of High-Temperature Superconductors by Polarized X-Ray Absorption Spectroscopy

Unusual Temperature-Dependent Behavior of the [\text{actual symbol not reproducible}] Energy Gap

Metal and Semiconductor Overlayers on [\text{actual symbol not reproducible}]

Electronic Properties of [\text{actual symbol not reproducible}]

Hyperfine Interactions, Magnetic Properties

Introduction to the Nuclear Magnetic Resonance (NMR) in High-T\(_c\) Superconductors

p. 88

p. 93

p. 99

p. 104

p. 108

p. 113

p. 119

p. 127

p. 134

p. 141

p. 145

p. 149

p. 155
Probing the Electronic Structure of Y-Ba-Cu-O Superconductors by Cu, O and Ba NQR and NMR
Vortex Lattice and Vortex Motion in [actual symbol not reproducible] and [actual symbol not reproducible] Superconductors from [superscript 89]Y NMR p. 175
[superscript 205]TI NMR in the High-T[subscript c] Superconductor [actual symbol not reproducible] p. 196
[superscript 1]H-NMR in p. 205
Probing the Flux Distribution of Thin Films by Surface Spin Probes p. 209
Optical Spectroscopy, Raman Scattering
Possible Origins of the Continuum in the Cu-O Plane-Polarized Raman Spectra of Copper-Oxide Superconductors p. 215
Normal-State Conductivity of Cuprate Superconductors: One-Component and Two-Component Viewpoints p. 225
Resonant Raman Scattering in [actual symbol not reproducible] Single Crystals p. 235
Normal-State Infrared Response from Ellipsometric Measurements: [actual symbol not reproducible] p. 244
Change of Electronic Structures with Varying Lattice Distortion and Metal Valence in Titanium and Vanadium Oxides p. 249
Tests for Nonreciprocal Optical Effects in High-Temperature Superconductors p. 256
Search for Time Reversal Symmetry Violation in High-Temperature Superconductors p. 263
Far-Infrared Applications of High-Temperature Superconductors: Fabry-Perot Resonators and Fast Detectors p. 269
Application of [actual symbol not reproducible] Thin Films on Silicon Substrates for Far-Infrared Fabry-Perot Resonators p. 274
Giant Voltages Upon Surface Heating in Normal [actual symbol not reproducible] Films Explained by an Atomic-Layer Thermopile p. 278
Damping of Spin Excitations in the HTC-Cuprates: Undoped and Lightly Doped Material p. 286
Raman Study of the Order Parameter in Oxide Superconductors p. 291
Impurities and Raman Scattering in High-T[subscript c] Superconductors p. 296
Polarization-Dependent Electronic Raman Scattering in Single Crystals of [actual symbol not reproducible] p. 300
Phonon Softening and Electron-Phonon Interaction in [actual symbol not reproducible] p. 310
Phonon Behavior in the Bi-Sr-Ca-Cu-O-System p. 314
Optical and Electrical Properties of Rare-Earth Substituted Ceramic Samples of the Y-Ba-Cu-O-System
Far-Infrared Properties of [actual symbol not reproducible] Ceramics
Influence of the Oxygen Content on the Optical Conductivity Function of [actual symbol not reproducible]
Effect of Cu-O Planes and Oxygen Content on Optical Properties of BISCO Crystals
Optical Anisotropy and Electron-Phonon Coupling in [actual symbol not reproducible] Single Crystals
Midgap Electronic States in Semiconducting [actual symbol not reproducible]: A NIR Excited Raman Investigation
Optical Absorption due to Pr$^{3+}$ 4f-4f Transitions in [actual symbol not reproducible]
Theory
One- and Two-Particle Excitations in Doped Mott-Hubbard Insulators
Consistent Description of High-T[subscript c] Superconductors with the Three-Band Hubbard Model: Quantum Monte Carlo Studies
Relation Between Transition Temperature, London Penetration Depth and Kosterlitz-Thouless Behavior in Superconductors
"Small" Masses and Strong Coupling in High-T[subscript c] Superconductors and in Heavy-Fermion Compounds
Electronic Structure and Superconductivity in [actual symbol not reproducible] Superlattices
Intermediate Range Order in the Possibility of Nonlinear Excitations in the Doping Subsystems of Cuprates
Phase Separation and High-T[subscript c] Superconductivity
Temperature-Dependent Phase Separation in the Emery Model
Pairing Interaction Induced by Distortive Electron-Lattice Coupling
Cooperative Electronic Phenomena in High-T[subscript c] Superconductors
Calculation of Electronic Excitation and Ionization Process in High-T[subscript c] Superconductors
Investigation of Tunneling, Linear and Nonlinear Optical Properties of Negative-U Local-Pair Model for Oxide High-T[subscript c] Superconductors
Electric Field Gradient Calculations of [actual symbol not reproducible]
Are There Ordering Effects in Ba(Pb,Bi)O[subscript 3] and (Ba,K)BiO[subscript 3]?*?
Constraint-FLAPW Calculations and Determination of Hubbard Model-Parameters for BaBiO[subscript 3]
Electronic Structure Aspects of the Pressure Dependence of T[subscript c] in High-T[subscript c] Superconductors
Charge-Transfer Interplay Between Cu-O Planes in the [actual symbol not reproducible] Family of Superconductors: Its Dependence on Oxygen Ordering and Stoichiometry
Anharmonic Effects in the Apex O Phonon in Relation to the Background Continuum in High-T[subscript c] Cuprates
Fullerenes
Fullerenes and Fullerites: New Forms of Carbon
Temperature- and Doping-Induced Phase Transitions in C[subscript 60]
Preparation of Single-Crystal Buckminster Fullerenes from Transport Reactions  p. 471
Superconducting Properties of Fullerenes Doped with Binary Thallium Alloys  p. 475
Electronic Structure Studies of Fullerites and Fullerides  p. 482
X-Ray Absorption Study of Iodine-Doped C[subscript 60]  p. 492
In-situ UV/VIS and Infrared Spectroscopy of Potassium-Doped C[subscript 60]  p. 497
Infrared Absorption by Charged Phonons in Doped C[subscript 60]  p. 501
Van der Waals Cohesion and Plasmon Excitations in C[subscript 60] Fullerite  p. 507
Fullerene Field-Effect Transistors  p. 512
High-Resolution Electron Energy Loss Spectroscopy of Thin C[subscript 60] Films  p. 516
Electronic Structure of Alkali-Metal Doped C[subscript 60]: Dependence of the Fermi-Level Densities of States on the Lattice Parameter  p. 520
Index of Contributors  p. 525
