Invited surveys
Algebraic specification of concurrency p. 1
Objects and their specification p. 40
The use of sorts in algebraic specifications p. 66
Implementation and behavioural equivalence: a survey p. 93
Contributed papers
Relationships between logical frameworks p. 126
Label algebras: a systematic use of terms p. 144
How to specify non determinism and true concurrency with algebraic term nets p. 164
Bounded implementation of algebraic specifications p. 181
New concepts of amalgamation and extension for a general theory of specifications p. 199
Nonequivalence of categories for equational algebraic specifications p. 222
Process semantics of temporal logic specifications p. 236
The object-based specification language II: concepts, syntax, and semantics p. 254
Specifications with observable formulae and observational satisfaction relation p. 271
Event logic for specifying abstract dynamic data types p. 292
A soft stairway to institutions p. 310
Generic classes in an object-based language p. 330
