Restricted Graph Classes
On improved time bounds for permutation graph problems p. 1
A simple test for interval graphs p. 11
Tolerance graphs and orders p. 17
Scheduling and Related Problems
On scheduling problems restricted to interval orders p. 27
Scheduling with incompatible jobs p. 37
Generalized coloring for tree-like graphs p. 50
Parallel and Distributed Algorithms I
Optimal (parallel) algorithms for the all-to-all vertices distance problem for certain graph classes p. 60
Topology of parallel networks and computational complexity p. 70
Parallel triangulation of nonconvex polytopes p. 78
Combinatorial Graph Problems I
Kayles on special classes of graphs - An application of Sprague-Grundy theory p. 90
A linear time algorithm for isomorphism of graphs of bounded average genus p. 103
Improved algorithms for routing on two-dimensional grids p. 114
Minimum rectilinear Steiner trees for intervals on two parallel lines p. 123
Parallel and Distributed Algorithms II
A new characterization of tree medians with applications to distributed algorithms p. 135
Graph Decomposition
The 3-edge-components and a structural description of all 3-edge-cuts in a graph p. 145
On assembly of 4-connected graphs p. 158
On the homogeneous decomposition of graphs p. 170
Combinatorial Graph Problems II
Embeddings in recursive combinatorial networks p. 184
On shortcutting digraphs p. 205
An efficient algorithm to recognize prime undirected graphs p. 212
On the complexity of partial order properties p. 225
Graph Grammars and Geometry
Probabilistic graph grammars p. 236
Single vs. double pushout derivations of graphs p. 248
Hexagonal grid drawings p. 263
Modelling by Graphs
Graph algorithms = iteration + data structures? The structure of graph algorithms and a corresponding style of programming p. 277
Petri nets, hypergraphs and conflicts p. 293
Analysis and manipulation of Boolean functions in terms of decision graphs p. 310
The expressiveness of silence : Tight bounds for synchronous communication of information using bits and silence p. 321
The power and the limitations of local computations on graphs p. 333
List of Participants p. 346
