Preface

Cellular and Metabolic Changes Cause by Mineral Dusts

The Role of Active Oxygen Species in Uptake of Mineral Particles by Tracheobronchial Epithelial Cells p. 1

Oxygen Radical Generation by Asbestos and Its Correlation to Cytotoxicity p. 9

Fiber-Induced Hydroxyl Radical Formation and DNA Damage p. 23

Involvement of the Oxidative Stress in the Toxicity of Iron-Containing Particles on Tracheal Epithelium in Primary Culture p. 39

The Role of Iron in Asbestos-Induced Cancer p. 53

Time-lapse Video Light Microscopic and Electron Microscopic Observations of Vertebrate Epithelial Cells Exposed to Crocidolite Asbestos p. 63

The Effect of MMMF on the Kinetics of Cytokine Expression in Murine Lung Populations: Role in Fibre-induced Disease p. 79

The Second Messenger System in Diseases Caused by Mineral Dusts p. 91

Transcriptional Regulation of IL-1[beta] and IL-6 by TNF-[alpha] in Asbestosis Is Mediated by NF-IL6-like Motifs p. 109

Type II Epithelial Cell Proliferation and Surfactant Lipid Turnover in Silicosis p. 127

Role of Nitric Oxide Radicals in Asbestos-Induced Injury p. 141

Cytotoxicity and Cell-stimulating Activity of Ultrafine Titanium Dioxide p. 151

Carcinogenic Effects in Rats of Exposure to Different Minerals from Metallic Mine Ores, Radon and Radon Daughters p. 159

Biological Effects of a New Type of Pure Carbon (Fullerenes) in vitro p. 165

Molecular Changes and DNA Alterations Produced by Mineral Dusts p. 171

In vitro DNA and Chromosome Damage Produced by Some Minerals and Man-Made Particles on Rat Pleural Mesothelial Cells (RPMC) - Mechanisms and Relationship with in vivo Experimental Findings p. 183

Evaluation of Proinflammatory Cytokine Expression in Alveolar Macrophages and in the Lung of Pneumoconiotic Patients p. 193

Activation of Early Cellular Responses by Asbestos: Induction of c-FOS and c-JUN Protooncogene Expression in Rat Pleural Mesothelial Cells p. 205

Molecular Alterations in Murine Mesotheliomas Induced by Crocidolite Asbestos p. 215

Long and Short Amosite Asbestos Samples: Comparison of Chromosome-damaging Effects to Cells in Culture with in vivo Pathogenicity p. 221

Induction of DNA Damage after Rats Exposure to Crocidolite Asbestos Fibres p. 227

Unscheduled DNA Synthesis (UDS) Induced in vitro by Cadmium in Tracheal Epithelial Cells of Rat and Hamster p. 233

In Vivo Dust-Related Pathological Processes: Correlations Between in Vitro and in Vivo Data p. 239

Pulmonary Toxicity of Cobalt containing Dusts p. 239

Chronic Inhalation Toxicity of Fibrous Glass in Rats p. 247

A Comparison of Alveolar Macrophage Cytotoxicity and Ability to Cause Inflammation in the Mouse Peritoneal Cavity for a Range of Different Fibre Types at Equal Fibre Number p. 255

Correlation of in vitro and in vivo Studies on the Bioeffects of Mineral Particles p. 263
Comparative Studies with Natural and Man-Made Mineral Fibres in vitro and in vivo p. 273

Comparison of Pulmonary Effects in Rats Exposed to Size-Separated Preparations of Para-Aramid or Chrysotile Asbestos Fibres after 2-week Inhalation Exposures p. 285

Investigation of the Biodurability and Carcinogenicity of Different Man-Made Mineral Fibres p. 299

Quantitative Relationship Between Emphysema and Lung Minerals in Man p. 305

Carcinogenic Asbestos Fibers in the Parietal Pleura p. 311

Pleural Lesions Induced by Mineral Dusts, Fibers and Chemicals p. 317

Comparisons of in vitro Cytotoxicity Results with in vivo Pulmonary Effects Following Inhalation Exposures to a Variety of Mineral Dusts: How Well Do They Compare? p. 325

Physico-Chemical Properties of Minerals in Relation to Their Biological Effects

Particle-Associated Hydrocarbons and Lung Cancer; the Correlation Between Cellular Dosimetry and Tumour Distribution p. 337

Which Surface Functionalities Are Implied in Dust Toxicity p. 347

Role of Transition Metal Compounds in the Capacity of Dusts to Generate Electrophilic Species p. 359

Surface Properties of Respirable Silicate and Aluminosilicate Dusts Affecting Bioavailability p. 369

Significance of Surface Properties of Quartz and Quartz-Containing Mineral Dusts to the Pulmonary Toxicity p. 381

The Cytotoxicity of Respirable Coal Dusts p. 387

Appearance of Very Electrophilic Species Generated by Some Iron Oxides: Effect of Iron Chelators and Reducing Agents p. 397

Kinetics of Asbestos-Induced Haemolysis of Human Red Blood Cells p. 403

Oxidising Activity of Some Metallic Dusts in Relation to Oxidative Stress Mechanisms p. 411

Identification and Quantification of Fibre-Induced Lipid Peroxidation Products by GC-MSD p. 417

Effect of Chelators on the Surface Properties of Asbestos p. 425
