An emission/reception chain modelling of the WiMAX access network p. 1
IEEE 802.11 goodput analysis for mixed real time and data traffic p. 15
An efficient trigger to improve intra-WiFi handover performance p. 29
Ultra wide band over fibre transparent architecture for high bit-rate home networks p. 39

Home networking at 60 GHz : challenges and research issues p. 51
Energy efficiency in future home environments : a distributed approach p. 69
Avoiding energy-compromised hotspots in resource-limited wireless networks p. 85
QoS management in autonomic home networks p. 101
Managing collaboration and competition of multiple WAN services in a residential network p. 111

Coherence bandwidth and its relationship with the RMS delay spread for PLC channels using measurements up to 100 MHz p. 129
Time/frequency analysis of impulsive noise on powerline channels p. 143
New architecture for an ultra broadband home area network with spread connectivity and autonomic functions p. 151
Group source routing protocol with selective forwarding for mobile ad hoc networks p. 163

Intelligent routing scheme in home networks p. 179
OpenPattern project : a comprehensive modular routing platform p. 197
A design of context aware smart home safety management using by networked RFID and sensor p. 215
Embedded script-driven home-automation with sensor networks p. 225
Next WSN applications using ZigBee p. 239
Using 802.15.4 to communicate and extend functionality in X10 wired networks p. 255
IPv6 and homenetworking p. 267
Hand-around on seamless services and mobility in home networking p. 275
Dynamic TCO optimization for IPTV service provider p. 295
Networked appliances for home healthcare and lifestyle management p. 313
Remote access VPNs performance comparison between Windows Server 2003 and Fedora 6 p. 329
