Spin Dynamics: Fast Switching of Macro-spins
Introduction
Spin and Its Kinetics and Dynamics
Basic Concepts of Spin
Kinetics of Spin: Spin Current
Dynamics of Spin: Bloch Equation, Landau-Lifshitz Equation, and Landau-Lifshitz-Gilbert Equation
Macro-spin Reversal with a Static Magnetic Field
A Nonlinear Dynamics Picture of Magnetization Reversal
The Exactness of SW-Limit at Infinitely Large Dissipation
Critical Value of Damping Constant
Ballistic Reversal
Macro-spin Reversal with a Time-Dependent Magnetic Field
Strategy I: Field Following the Magnetization Motion
Strategy II: Synchronizing the Magnetization Motion with a Circularly Polarized Microwave
Theoretical Limits of Switching Field/Current and Optimal Reversal Pulses
Summary
