Why Use Logic? Why Prove Programs Correct?

Propositions
Reasoning Using Equivalence Transformations
A Natural Deduction System
Predicates
Notations and Conventions for Arrays
Using Assertions to Document Programs
The Semantics of a Small Language
The Predicate Transformer wp
The Commands Skip, Abort and Composition
The Assignment Command
The Alternative Command
Procedure Call
The Iterative Command
Procedure Call
The Development of Programs
Introduction
Programming as a Goal-Oriented Activity
Developing Loops From Invariants and Bounds
Developing Invariants
Notes on Bound Functions
Using Iteration Instead of Recursion
Efficiency Considerations
Two Larger Examples of Program Development
Inverting Programs
Notes on Documentation
Historical
Notes
Appendix 1-4
Answers to Exercises
